More than ever before the changing environmental and political landscape in the Arctic requires stability and foreseeability based on resilient common norms. The emerging legal orders in the Arctic cannot be legitimately created or effectively implemented unless all relevant actors are involved. Simultaneously, it must always be based on respect for the sovereign rights of the eight Arctic states in the region, as well as the tradition and cultural livelihood of the local communities. It is this delicate balance between Arctic and non-Arctic interests that is the core problematique for the emerging legal orders in the Arctic. This book critically examines the role of non-Arctic actors in this advancement of the shape and scope of the Arctic legal order. Discussing the admittance and participation of observer states and organisations in the Arctic Council, including task force meetings where new treaties are negotiated, it details the issues and successes this can result in. Setting up the context of the current legal orders in the Arctic the book discusses Asian, indigenous and European perspectives, amongst others. There is a strong focus on the groundbreaking fisheries agreement of November 2017 in the Central Arctic Ocean (CAO), and the impact on both Arctic and non-Arctic actors. Interests in marine living resources, scientific cooperation and the Arctic shipping regimes and governance are also thoroughly discussed from multiple perspectives. The book combines the expertise of academics and practitioners in the fields of international law and Arctic governance, uniquely focusing on Asian actors in the Arctic legal order-making.

Title: Chairman Xi Remakes the PLA: Assessing Chinese Military Reforms
Published: Washington: National Defense University Press, 2019
Physical Description: xi, 768 pages: illustrations; 23 cm.
Notes: Includes index.
Notes: Foreign analysts have only begun to explore the contents, drivers, and possible implications of Xi’s campaign to restructure the PLA. Many issues remain shrouded in uncertainty and warrant further examination. These include:
what impacts the reforms are having on PLA operations, training, and logistics; the prospects for the ground forces as the reforms’ nominal biggest loser, as well as the other services; challenges the PLA is facing in cultivating operational commanders; the structure, roles, and missions of the SSF and JLSF; how the downsizing is being carried out, and what impact it might have on social stability; the implications of reform for Party control over, and Xi’s influence within, the PLA; whether and how the reforms will improve coordination between the PLA and the civilian science and technology sector; what the implications might be for the defense acquisition process. This volume explores these and other dimensions of China’s military reforms as they were planned and implemented between 2013 and 2018.

Title: La Chine e(s)t le monde : essai sur la sino-mondialisation
Author: Boisseau du Rocher, Sophie
Additional Author: Dubois de Prisque, Emmanuel
Published: Paris: Odile Jacob, 2019
Physical Description: 295 pages; 22 cm.
Notes: Promise a la premiere place mondiale, la Chine entend jouer un role decisif sur la scene internationale. Quelle est sa vision et comment aborde-t-elle le monde et la mondialisation ? Avec quelles consequences pour l'Occident et l’Europe ? Ce livre montre comment le president Xi Jinping et le Parti communiste chinois ont recycle l’antique formule du 'Tianxia' - qui designe traditionnellement 'tout ce qui est sous le ciel' - pour placer la Chine au centre des flux mondiaux. Il explique aussi comment elle mobilise toutes ses ressources (influence economique, attrait de sa culture, propagande et intimidation) pour transformer les regles du jeu dans des domaines aussi divers que le droit, les normes industrielles, l'environnement, l'alimentation ou la recherche universitaire. Ce faisant, Pekin modifie a son avantage un systeme international largement dessine par l'Occident. Des lors se pose une question : l’ambition chinoise n’est-elle pas un risque, d’abord pour les Chinois eux-memes, mais aussi pour le reste du monde et les biens communs de l'humanite ?

Physical Description: 251 pages: illustrations; 22 cm.
Notes: Bibliography: p. 209-220.

Recent revelations about Russia's cyber disinformation campaigns underscore today's great challenges. The author provides here an in-depth and up-to-date examination of the importance of cyberspace operations, why such activities are so often successful, and how influence operations span the spectrum of conventional and digital statecraft.

Title: Democracy and Dictatorship in Europe: From the Ancien Regime to the Present Day
Author: Berman, Sheri, 1965-
Published: Oxford, UK: Oxford University Press, 2019
Physical Description: x, 545 pages: illustrations; 25 cm.
Notes: Includes index.
Notes: The author traces the long history of democracy in its cradle, Europe. She explains that in fact, just about every democratic wave in Europe initially failed, either collapsing in upon itself or succumbing to the forces of reaction. Yet even when democratic waves failed, there were always some achievements that lasted. Even the most virulently reactionary regimes could not suppress every element of democratic progress. Panoramic in scope, the author takes readers through two centuries of turmoil: revolution, fascism, civil war, and - finally - the emergence of liberal democratic Europe in the postwar era. A magisterial retelling of modern European political history, this book not only explains how democracy actually develops, but how we should interpret the current wave of illiberalism sweeping Europe and the rest of the world.

**EU--ARMED FORCES**
Title: Defendre l'Europe : plaidoyer pour une armee europeenne  
Author: Mauro, Frederic  
Additional Author: Jehin, Olivier  
Published: Paris : Nuvis, 2019  
Physical Description: 126 pages : illustrations ; 19 cm.  
Notes: Trois chefs d'Etat ou de gouvernement - le president de la Republique francaise, la chancelliere federale allemande et le president du gouvernement espagnol - ont appele a la constitution d'une 'armee europeenne'. Quelle mouche les a donc piques ? Le fait est que cette idee agace prodigieusement. A l'exterieur de l'Europe, parce qu'elle suppose l'autonomie strategique, l'armee europeenne irrite tous ceux qui revent de voir celle-ci cliente docile, alliee mais surtout alignee. A l'interieur de l'Union, parce qu'elle implique l'integration, elle effraie tous ceux qui, au sein des Etats membres, croient encore possible de s'en sortir seuls dans un monde qui ressemble chaque jour un peu plus a Jurassic Park qu'a Disney World. Or, c'est bien parce qu'elle est portee d'une volonte de dignite, de liberte et d'inddependance que cette idee est interessante et merite d'etre debattue. Telle est l'ambition du present ouvrage.

**EU—FOREIGN RELATIONS**

Title: L’Europe puissance, mythes et realites : une etude critique du concept d'Europe puissance  
Author: Nivet, Bastien, 1976-  
Published: Pessac : Presses Universitaires de Bordeaux, 2019  
Physical Description: 308 pages ; 24 cm.  
Series: Perspectives Europeennes  
Notes: Bibliography: p. 293-302.  
Notes: Alors que les citoyens des Etats membres de l'Union europeenne (UE) sont a nouveau appeles a choisir leurs deputes europeens au printemps 2019, cet ouvrage interroge la signification et la pertinence d'un concept frequemment mobilise dans les debats politiques et academiques europeens : L'Europe puissance. Tensions avec la Russie, interrogations sur les relations transatlantiques et l'autonomie strategique europeenne a l'heure de l'administration Trump, incertitudes sur l'aptitude de l'UE a defendre ses interets et sa propre vision d'un monde multilateral a travers des enjeux comme le multilateralisme et le nucleaire iranien, questionnements permanents sur le role d'une UE eventuellement amputee du Royaume-Uni dans le vaste monde, ont renouvele des debats plus anciens. Pourquoi et comment parle-t-on d'Europe puissance alors que nombreux sont les sujets sur lesquels l'UE peine a faire entendre sa voix ? Comment rendre compte malgre tout de l'action et du role reels que joue l'Union sur la scene internationale ? En saisissant le concept d'Europe puissance comme un fragment de discours politique et mediatique mais aussi comme un objet universitaire etonnant, cet ouvrage etudie les liens complexes et parfois contradictoires entre la construction europeenne et la puissance, invitant a repenser l'une et l'autre dans le monde incertain d'aujourd'hui. Finalement, l'Europe puissance apparait comme un concept malleable dans le champ academique, et utile en tant que mythe de la construction europeenne comme fragment de discours politique et mediatique, ne decrivant pas une realite (l'UE telle qu'elle existe), mais un horizon, un ideal vers lequel la construction europeenne pourrait tendre selon ses partisans.

**FRANCE—ARMED FORCES**

Title: Le reveil des armees  
Author: Lasserre, Isabelle  
Published: Paris : Lattes, 2019  
Physical Description: 345 pages ; 22 cm.  
Notes: Jamis l'armee n'a autant fascine et incite de vocations. Les generaux deviennent des auteurs de best-sellers, les centres de recrutement et les ecoles d'officiers ne desemplisssent pas et la plupart des Francais ont désormais une bonne image de leur arme. Sans doute les actualites recentes - attentats, menaces terroristes, engagements de la France dans des conflits exterieurs ... - expliquent le basculement d'un pays pourtant historiquement antimilitariste. Cela semble d'ailleurs etre le cas un peu partout en Europe. Mais les raisons de ce nouvel engagement ne sont-elles pas plus profondes ? Alors que l'Etat et la societe ofrent une image de delitement, l'armee apparait pour beaucoup comme le dernier ecrin du courage, de la dignite et de l'autorite, et comme l'ultime lieu d'une possible ascension sociale. L'armee peut-elle, doit-elle etre un modele pour la societe ? A-t-elle les moyens des ambitions que l'Etat met en elle pour defendre le pays et le rang de la France dans le monde ?

GLOBAL FINANCIAL CRISIS, 2008-2009
Title: Crashed : How a Decade of Financial Crises Changed the World
Author: Tooze, Adam
Published: New York : Viking, 2018
Physical Description: xii, 706 pages : illustrations ; 25 cm.
Notes: Includes index.
Notes: We live in a world where dramatic shifts in the domestic and global economy command the headlines, from rollbacks in U.S. banking regulations to tariffs that may ignite international trade wars. But current events have deep roots, and, as the author demonstrates, the key to navigating today's roiling policies lies in the events that started it all - the 2008 economic crisis and its aftermath. This book offers an eye-opening and necessary reinterpretation of the personalities, decisions, and policies that dominated economic, political, and international events of the last tumultuous decade, and yet have been widely misunderstood or minimized in the wake of 'recovery'.

Author: Huver, Etienne
Additional Author: Razon, Boris, 1975-
Published: Paris : Stock, 2019
Physical Description: 253 pages ; 22 cm.
Notes: Les hackers russes qui ont pirate les mails du parti democrate americain en 2016, qui sont-ils ? Des artistes patriotes, comme le pretend Vladimir Poutine ou des mercenaires du clavier ? Pour repondre a ces questions, les auteurs ont rencontre des hackers francais, ils sont alies sur la ligne de front de la cyberguerre, en Ukraine et en Russie, ils ont debusque d'anciens dirigeants americains en charge de la cybersecurite et ecume les conferences de l'OTAN. Et ils ont infiltrer l'un des principaux forums de hacking russes, la ou se vend la matiere premiere des pirates : des donnees ou des failles de securite. Au fil des mois, ces hommes sont devenus le symbole et la figure de proue d'une Russie aggressive et sans vergogne. INTELLIGENCE SERVICE--USA
Title: Spying : Assessing US Domestic Intelligence since 9/11
Author: Tromblay, Darren E.
Published: Boulder, CO : Lynne Rienner, 2019
Physical Description: x, 245 pages ; 24 cm.
Notes: Bibliography: p. 223-236.
Notes: Initiated in the aftermath of the September 11 terrorist attacks, have the reforms of the US intelligence enterprise served their purpose? What have been the results of the creation of the Department of Homeland Security, the Office of the Director of National Intelligence, and a reorganized FBI? Have they helped to reduce blind spots and redundancies in resources and responsibilities ... and to prevent misuses of intelligence and law enforcement? How did a disaster like the Snowden scandal happen? The author answers these questions in his thorough, often provocative, assessment of post-9/11 US domestic intelligence activities in the pursuit of national security.

IRAN--FOREIGN RELATIONS
Title: Iran Resurgent : The Rise and Rise of the Shia State
Author: Abedin, Mahan
Published: London : Hurst, 2019
Physical Description: 290 pages ; 22 cm.
Notes: Includes index.
Notes: Iran has emerged from decades of isolation and struggle to become a leading, if not the pre-eminent, regional power. Iran projects its influence throughout the Middle East and parts of Central Asia. Moreover, Iranian diplomacy is active on the world stage, with long-term projects in Africa and South America. Before the unilateral US withdrawal in May 2018, the landmark nuclear deal of July 2015 was universally regarded as a major triumph as it involved the Islamic Republic successfully negotiating with several world powers to reach a mutually acceptable agreement. Crucially, whilst the nuclear deal restricts Iran’s nuclear programme for at least a decade, it doesn’t irreversibly dismantle any part of it. With internal Iranian politics stabilizing around a centrist administration led by President Rouhani, the country is set to continue on a path of regional strategic growth. But with clear signs that the Trump administration is determined to contain Iran’s regional influence, what is the risk of a military confrontation? This book argues that Iran has developed sufficient diplomatic strength and credible military capability to deter a full-scale US military assault. But absent a dramatic lowering of tensions, there remains a risk of limited clashes, with far-reaching consequences for regional security.

Japan Rearmed: The Politics of Military Power

Title: Japan Rearmed: The Politics of Military Power
Author: Smith, Sheila A., 1959-
Published: Cambridge, MT : Harvard University Press, 2019
Physical Description: xi, 333 pages : illustrations ; 22 cm.
Notes: Article Nine of Japan’s postwar constitution, drafted in 1946 under U.S. Occupation, claims that the Japanese people ‘forever renounce the use of force as a means of settling international disputes’. During the Cold War, the alliance with the United States allowed Japan to develop a largely defensive military, the Self-Defense Forces. Yet in the decades since, Japan has considered new ways to use its military. Demands from Washington for greater Japanese military participation in coalition forces and a gradual embrace in Japan of contributing to UN peacekeeping led to overseas deployments. Entering the 21st century, North Korea’s nuclear and missile proliferation and China’s growing maritime assertiveness have challenged Japanese strategists to confront their hesitancy over the use of force. This book examines this ambivalence over the military as an instrument of power and argues that the accelerating changes in Japan’s relationship with the United States and with its neighbors are forcing Tokyo’s political leaders to confront the idea that they may need to order their military to do what all militaries are expected to do: prepare for war.

NATO--ARMED FORCES--WOMEN
Title: NATO, Gender and the Military: Women Organising from Within
Author: Wright, Katharine A. M.
Additional Author: Hurley, Matthew M.
Additional Author: Gil Ruiz, Jesus Ignacio
Published: Abingdon, UK: Routledge, 2019
Physical Description: xv, 169 pages: illustrations; 24 cm.
Series: Routledge Studies in Gender and Security
Notes: Includes index.
Notes: This book examines NATO’s engagement with gender issues through its military structures. Drawing on newly declassified NATO documents, this volume provides the first comprehensive account of NATO’s long-established engagement with gender issues. These documents bring to the fore the stories of the NATO women and ‘gendermen’ who have organised within NATO across the decades to advocate on gender issues and highlights the continued challenges to pursuing transformative agendas within resistant institutions. The book argues that NATO is an institution of international hegemonic masculinity, with gender norms and values learnt by member and partner states through socialisation and the engagement of a masculinist protection logic. It therefore provides an important context for NATO’s recent implementation of the Women, Peace and Security agenda encapsulated in UN Security Council Resolution 1325 and the seven follow-up resolutions. The volume interrogates how Women, Peace and Security has mapped on to NATO’s pre-existing concerns as a global security actor, providing impetus for further critical knowledge building of NATO which centres on gender.

Notes: NATO’s decision to open itself to new members and new missions is one of the most contentious and least understood issues of the post-Cold War world. This book, a blend of memoirs and scholarship, takes us back to the decade when those momentous decisions were made. Former senior officials from the United States, Russia, Western and Eastern Europe who were directly involved in the decisions of that time describe their considerations, concerns, and pressures. They are joined by scholars who have been able to draw on newly declassified archival sources to revisit NATO’s evolving role in the 1990s.

NATO--HISTORY
Title: Enduring Alliance: A History of NATO and the Postwar Global Order
Author: Sayle, Timothy Andrews
Published: Ithaca, NY: Cornell University Press, 2019
Physical Description: 346 pages: illustrations; 24 cm.
Notes: Includes index.
Notes: Born from necessity, the North Atlantic Treaty Organization (NATO) has always seemed on the verge of collapse. Even now, some seventy years after its inception, some consider its foundation uncertain and its structure weak. The author recounts here how the western European powers, along with the United States and Canada, developed a treaty to prevent encroachments by the Soviet Union and to serve as a first defense in any future military conflict. As the growing and unruly hodgepodge of countries, councils, commands, and committees inflated NATO during the Cold War, the author shows that the work of executive leaders, high-level diplomats, and institutional functionaries within NATO kept the alliance alive and strong in the face of changing administrations, various crises, and the flux of geopolitical maneuverings. Resilience and flexibility have been the true hallmarks of NATO. As the book deftly shows, the history of NATO is organized around the balance of power, preponderant military forces, and plans for nuclear war. But it is also the history riven by generational change, the introduction of new approaches to conceiving international affairs, and the difficulty of diplomacy for democracies. As NATO celebrates its seventieth anniversary, the alliance once again faces challenges to its very existence even as it maintains its place firmly at the center of western hemisphere and global affairs.

NUCLEAR NONPROLIFERATION
Title: Bargaining over the Bomb: The Successes and Failures of Nuclear Negotiations
Author: Spaniel, William
Published: Cambridge, UK: Cambridge University Press, 2019
Physical Description: xi, 213 pages: illustrations; 24 cm.
Notes: Can nuclear agreements like the Iran deal work? This book develops formal bargaining models to show that they can over time, despite apparent incentives to cheat. Existing theories of nuclear proliferation fail to account for the impact of bargaining on the process. The author explores how credible agreements exist in which rival states make concessions to convince rising states not to proliferate and argues in support of nuclear negotiations as effective counter-proliferation tools. This book proves not only the existence of settlements but also the robustness of the inefficiency puzzle. In addition to examining existing agreements, the model used by the author serves as a baseline for modeling other concerns about nuclear weapons.

Title: The Rise and Fall of Peace on Earth
Author: Mandelbaum, Michael
Published: Oxford, UK : Oxford University Press, 2019
Physical Description: xiii, 218 pages ; 25 cm.
Notes: Includes index.
Notes: In the twenty-five years after 1989, the world enjoyed the deepest peace in history. This book examines that singularly peaceful quarter century. Its initial three chapters describe how and why peace came to be established in three important parts of the world: Europe (Chapter 1), where it was most firmly embedded; East Asia (Chapter 2), which was more peaceful than at any other time in its modern history; and the Middle East (Chapter 3), the least peaceful of the three regions during those 25 years. These chapters also describe and explain how and why the unprecedentedly peaceful conditions in each of the three regions came to an end. The fourth and final chapter explores the prospects for the revival of peace in the future.

Title: Pays du Golfe : les dessous d'une crise mondiale
Author: Boussois, Sebastien
Published: Malakoff : Armand Colin, 2019
Physical Description: 215 pages : illustrations ; 22 cm.
Notes: Depuis l'ete 2017, les pays du Golfe sont confrontes a une crise sans precedent : en rompant du jour au lendemain leurs relations diplomatiques avec le Qatar, accuse de soutenir l'Iran et de financer les organisations terroristes, l'Arabie saoudite, le Bahrein, les Emirats arabes unis et l'Egypte ont fait voler en eclat l'apparente unite au sein du Conseil de cooperation du Golfe. Cette crise, tout d'abord regionale, est rapidement devenue mondiale, car elle implique desormais de nombreux acteurs exterieurs et cristallise de multiples lignes de fractures annonciatrices d'une possible nouvelle guerre froide. En interrogeant les origines profondes de la crise, ses enjeux pour les pays du Golfe dans un contexte de necessaire reconversion economique, de guerre au Yemen et de rivalite croissante entre Arabie saoudite et Iran, cet ouvrage souligne l'importance fondamentale d'une stabilite de la zone, non seulement pour le Moyen-Orient, mais aussi pour l'Europe et tout l'Occident.

PUBLIC DIPLOMACY
Title: Public Diplomacy: Foundations for Global Engagement in the Digital Age
Author: Cull, Nicholas John
Published: Cambridge, UK: Polity Press, 2019
Physical Description: xiii, 217 pages: illustrations; 24 cm.
Series: Contemporary Political Communication
Notes: New technologies have opened up fresh possibilities for public diplomacy, but this has not erased the importance of history. On the contrary, the lessons of the past seem more relevant than ever in an age in which communications play an unprecedented role. Whether communications are electronic or hand-delivered, the foundations remain as valid today as they ever have been. Blending history with insights from international relations, communication studies, psychology, and contemporary practice, the author explores the five core areas of public diplomacy: listening, advocacy, cultural diplomacy, exchanges, and international broadcasting. He unpacks the approaches which have dominated in recent years - nation-branding and partnership - and sets out the foundations for successful global public engagement. Rich with case studies and examples drawn from ancient times through to our own digital age, the book shows the true capabilities and limits of emerging platforms and technologies, as well as drawing on lessons from the past which can empower us and help us to shape the future.

QAIDA (ORGANIZATION)
Title: Al-Qaida in Afghanistan
Author: Stenersen, Anne
Published: Cambridge, UK: Cambridge University Press, 2017
Physical Description: xvi, 206 pages: illustrations; 24 cm.
Notes: Bibliography: p. 181-197. Includes index.
Notes: Since 9/11, al-Qaida has become one of the most infamous and widely discussed terrorist organizations in the world, with affiliates spread across the globe. However, little-known are the group's activities within Afghanistan itself, something which the author examines in this book. Using an array of unique primary sources, she presents an alternative narrative of al-Qaida's goals and strategies prior to 9/11. She argues that al-Qaida's actions were not just an ideological expression of religious fanaticism and violent anti-Americanism, but that they were actually far more practical and organised, with a more revolutionary and Middle Eastern-focused agenda than previously thought. Through her analysis, we see how al-Qaida employed a dual strategy: with a small section focused on staging international terrorist attacks, but at the same time a larger part dedicated to building a resilient and cohesive organization that would ultimately serve as a vanguard for future Islamist revolutions.

RADICALIZATION
Title: Radicalisation : A Marginal Phenomenon or a Mirror to Society ?
Published: Leuven : Leuven University Press, 2019
Physical Description: 250 pages : illustrations ; 24 cm.
Series: CeMIS Migration and Intercultural Studies
Notes: Radicalisation is a topical and a much-discussed concept in current European societies. Its use in policy and societal discourses, such as media coverage and educational contexts, is very sensitive. This thought-provoking collection of essays critically addresses the topic of radicalisation from different angles, combining discipline-specific insights from the fields of sociology, philosophy, history, religious studies, and media studies, with new empirical data. The authors step away from readily available explanations and rethink the notion of 'the radical' by demonstrating that, in order to understand this phenomenon in all its dimensions rather than merely focusing on individuals or ideologies, it is crucial to include a contextual perspective and consider the complex interaction between individuals, groups, and institutions, both at a national and international level.

RISK MANAGEMENT--POLITICAL ASPECTS
Title: Political Risk : Facing the Threat of Global Insecurity in the Twenty-First Century
Author: Rice, Condoleezza, 1954-
Additional Author: Zegart, Amy
Published: London : Weidenfeld & Nicolson, 2018
Physical Description: 321 pages : illustrations ; 20 cm.
Notes: Includes index.
Notes: In the past, the chief concern used to be whether a foreign dictator would nationalize the country's oil industry. Today, political risk stems from a widening array of agents, from Twitter users and terrorists to hackers and insurgents. This means that in today's globalized world there are no 'safe' bets. Political risk affects companies and organisations of all sizes, operating everywhere from London to Lahore, even if they don't know it. This book investigates and analyses this shifting landscape, suggests what businesses can do to navigate it, and explains how all of us can better understand these rapidly changing geopolitical dynamics.

Title: La Russie dans le monde
Additional Author: Tinguy, Anne de, ed.
Published: Paris : CNRS Editions, 2019
Physical Description: 286 pages : illustrations ; 22 cm.
Notes: L'annexion de la Crimée par la Russie, son intervention en Syrie, l'affaire Skripal ont propulse Moscou sur le devant de la scène. Elles ont aussi contribue à bouleverser le système international et le rôle que la Russie joue en son sein. Du fait de sa politique, la Russie a perdu l'Ukraine et fragmente l'espace postsoviétique qu'elle considere comme sa sphere d'influence, elle s'est alienée une bonne partie de l'Occident, elle s'est engagee dans un incertain virage vers l'Asie, etc. Pres de vingt ans apres l'arrivee au pouvoir de Vladimir Poutine, ces evenements relancent les interrogations sur les objectifs poursuivis par la Russie. Quels sont les facteurs qui determinent ses actions exterieures? Quelle est sa capacite a se remettre des bouleversements qu'elle a connus depuis 1991 ? Cet ouvrage se penche sur ces questions en accordant une attention particuliere aux perceptions et aux representations. Il explore la vision que la Russie a de l'étranger en la confrontant a la realite de la place qu'elle tient sur la scene internationale ainsi qu'aux regards portes sur elle par le monde exterieur. En croisant ces differents regards, il a pour but de contribuer a la comprehension de la trajectoire russe.

Notes: From attacks in the streets of Paris and London to murders in marketplaces in Kabul and Baghdad, the suicide bomber is the real weapon of mass destruction, killing and injuring over a quarter of a million people since its first occurrence in nineteenth-century Russia. But what leads men and women to blow themselves up, believing they will usher in a utopia they'll never inhabit? How did so many modern jihadists come to adopt its use? Published: Cambridge, UK: Cambridge University Press, 2017
Physical Description: x, 266 pages; 24 cm.
Series: Cambridge Companions to Religion

Notes: There is currently much discussion regarding the causes of terrorist acts, as well as the connection between terrorism and religion. Terrorism is attributed either to religious 'fanaticism' or, alternately, to political and economic factors, with religion more or less dismissed as a secondary factor. This book examines this complex relationship between religion and terrorism phenomenon through a collection of essays freshly written for this volume. Bringing varying approaches to the topic, from the theoretical to the empirical, the Companion includes an array of subjects, such as radicalization, suicide bombing, and rational choice, as well as specific case studies. The result is a richly textured collection that prompts readers to critically consider the cluster of phenomena that we have come to refer to as 'terrorism', and terrorism's relationship with the similarly problematic set of phenomena that we call 'religion'.

USA. CENTRAL INTELLIGENCE AGENCY
Title: The CIA and the Politics of US Intelligence Reform
Author: Durbin, Brent
Published: Cambridge, UK : Cambridge University Press, 2017
Physical Description: viii, 330 pages ; 24 cm.
Notes: Includes index.
Notes: Examining the political foundations of American intelligence policy, this book develops a new theory of intelligence adaptation to explain the success or failure of major reform efforts since World War II. The author draws on careful case histories of the early Cold War, the Nixon and Ford administrations, the first decade after the Cold War, and the post-9/11 period, looking closely at the interactions among Congress, executive branch seniors, and intelligence officials. These cases demonstrate the significance of two factors in the success or failure of reform efforts: the level of foreign policy consensus in the system, and the ability of reformers to overcome the information advantages held by intelligence agencies. As these factors ebb and flow, windows of opportunity for reform open and close, and different actors and interests come to influence reform outcomes. The author concludes that the politics of US intelligence frequently inhibit effective adaptation, affecting America’s security and the civil liberties of its citizen.

USA--MILITARY POLICY
Title: The Senkaku Paradox: Risking Great Power War over Small Stakes
Author: O'Hanlon, Michael E.
Published: Washington : Brookings Institution Press, 2019
Physical Description: x, 258 pages : illustrations ; 23 cm.
Notes: Includes index.
Notes: In recent years, the Pentagon has elevated its concerns about Russia and China as potential military threats to the United States and its allies. But what issues could provoke actual conflict between the United States and either country? And how could such a conflict be contained before it took the world to the brink of thermonuclear catastrophe, as was feared during the cold war? The author wrestles with these questions in this insightful book, setting them within the broader context of hegemonic change and today’s version of great-power competition. The book examines how a local crisis could escalate into a broader and much more dangerous threat to peace. What if, for example, Russia’s ‘little green men’ seized control of a community, like Narva or an even smaller town in Estonia, now a NATO ally? Or, what if China seized one of the uninhabited Senkaku islands now claimed and administered by Japan, or imposed a partial blockade of Taiwan? Such threats are not necessarily imminent, but they are far from inconceivable. Washington could be forced to choose, in these and similar cases, between risking major war to reverse the aggression, and appeasing China or Russia in ways that could jeopardize the broader global order. The author argues that the United States needs a better range of options for dealing with such risks to peace. He advocates ‘integrated deterrence’, which combines military elements with economic warfare. The military components would feature strengthened forward defenses as well as, possibly, limited military options against Russian or Chinese assets in other theaters.

Author: Bentegeat, Henri, 1946-

Physical Description: 492 pages ; 24 cm.

Notes: En ce temps de trouble et d'incertitude, alors que l'illusion d'une paix universelle et definitive s'efface devant la persistance des fanatismes et des violences qui nourrissent d'interminables conflits, le role et la responsabilite des chefs d'Etat confrontes a la guerre meritent une attention nouvelle. Comment, au cours de l'histoire, ont-ils affronte ce fleau tragique pour le contenir ou l'encourager, pour proteger leurs peuples et promouvoir leurs desseins ou pour assouvir leurs reves de grandeur ? De 1850 a nos jours, dix parmi les plus celebres, dont quatre francais, ont ete choisis pour illustrer les ressorts de la volonte politique dans ce domaine essentiel et paroxystique de leur charge. ARTIFICIAL INTELLIGENCE--MILITARY APPLICATIONS
Title: How Viable Is International Arms Control for Military Artificial Intelligence? Three Lessons from Nuclear Weapons
Author: Maas, Matthijs M.
Published: 2019
Notes: Many observers anticipate ‘arms races’ between states seeking to deploy artificial intelligence (AI) in diverse military applications, some of which raise concerns on ethical and legal grounds, or from the perspective of strategic stability or accident risk. How viable are arms control regimes for military AI? This article draws a parallel with the experience in controlling nuclear weapons, to examine the opportunities and pitfalls of efforts to prevent, channel, or contain the militarization of AI. It applies three analytical lenses to argue that (1) norm institutionalization can counter or slow proliferation; (2) organized ‘epistemic communities’ of experts can effectively catalyze arms control; (3) many military AI applications will remain susceptible to ‘normal accidents’, such that assurances of ‘meaningful human control’ are largely inadequate. The author concludes that while there are key differences, understanding these lessons remains essential to those seeking to pursue or study the next chapter in global arms control.

Nombre de dirigeants ont fait adopter des mesures leur permettant de prolonger leur présence à la tête de l'État et les partis d'opposition sont faibles. Quand une alternance se produit au plus haut niveau, celle n'entraîne pas pour autant une amélioration de la gouvernance. **THE MULTIDIMENSIONAL NATURE OF THE BOKO HARAM CONFLICT**

**Author:** Hentz, James J.  
**Published:** 2018  
**In:** SMALL WARS AND INSURGENCIES, vol. 29, nos. 5 - 6, October - December 2018, p. 839-862.

Notes: The debate concerning the Nigerian terrorist Boko Haram is typically simplified across two false dichotomies. First, it is treated as either a local conflict in northeast Nigeria with its epicentre in Borno State or part of a broader conflict in Northwest Africa (and beyond), encompassing northern Cameroon, southern Chad, Niger, and reaching into Libya and Mali. The second dichotomy concerns whether it is animated by local material conditions on the ground, or is part of a broader anti-West jihad. The Boko Haram insurgency is not that simple. It is, rather, a multidimensional conflict and can change overtime.

Title: Boko Haram's Increasingly Sophisticated Military Threat
Author: Omeni, Akali
Published: 2018
In: SMALL WARS AND INSURGENCIES, vol. 29, nos. 5 - 6, October - December 2018, p. 886-915.
Notes: This paper evaluates Boko Haram’s military capabilities and details the process of how its standing army, driven by these capabilities, came to pose a phased threat between 2013 and 2015 in particular. This was a period when military fighting dominated the insurgency in north-east Nigeria. Whereas there is an abundance of literature on Boko Haram’s histories and the impact of its insurgency on north-east Nigeria, analysis of Boko Haram’s military campaigning is still deficient. Attempting to fill this gap, this paper uses field findings and battlefield case studies from north-east Nigeria to highlight how Boko Haram’s overt front – its standing army – came to supplant its guerrilla operations as the main security threat to the frontier area. This pivot towards military fighting, for a group initially composed of a few ragtag combatants, on the surface might seem surprising. Yet, whereas Boko Haram may lack the popular support required for ‘people’s war’, classic insurgency theories nevertheless hold some explanatory power for this deliberate shift: away from guerrilla warfare as the expedient of the weaker side, and towards the use of a large standing army of locals to swarm, and sometimes successfully overrun, state forces.

CHINESE REUNIFICATION QUESTION, 1949-
Title: Le reve taiwanais de Xi Jinping
Author: Duchatel, Mathieu
Published: 2019
In: POLITIQUE INTERNATIONALE, no. 163, printemps 2019, p. 267-279.
Notes: Xi Jinping solemnly declared that China's ultimate goal by 2040 - the 100th anniversary of the People's Republic - is to be a global leader in terms of both national power and international influence. This is a huge challenge that cannot be envisaged without the return of Taiwan to Beijing's control. All the polls, however, show that the Taiwanese do not want reunification, making this a feat that will not easily be accomplished. Much will depend on the results of the presidential and legislative elections set for 2020 on the island. They oppose the current president - and the long-lived Kuomintang party, which favours a gradual rapprochement with the mainland through economic ties. Xi Jinping would bring considerable pressure to bear on the Taiwanese government to oblige it to sign a political agreement paving the way for reunification. On the other hand, nobody knows how he will manage relations with a government that supports Taiwan's independence.

CIVIL-MILITARY RELATIONS--FORMER COMMUNIST COUNTRIES
Title: Can NATO's 'New' Allies and Key Partners Exercise National-Level Command in Crisis and War?
Author: Young, Thomas-Durell
Published: 2018
Notes: This article posits that most postcommunist members of NATO and key partners continue the practice of using communist concepts of command at the national level of governance. These concepts include the hyper-centralization of decision making, collective decision making, and of most concern, unclear chains of command and alignment of authority with responsibility. Combined, these concepts have the potential for inhibiting the timely and clear command of a nation's armed forces, let alone their effective assimilation into the alliance's integrated command structure. Such an eventuality has clearly negative implications for the alliance generally, but these weaknesses also could have the unexpected consequence of compromising 'new' allies' national sovereignty in crisis and war.

Notes: In the last decade, cyber conflict has become a main feature of international politics and a growing concern for strategic stability and collective security. Unfortunately, cyber conflict suffers from a lack of conceptual clarity about its impact on collective security and a lack of consensus among international actors on how to interpret it. This article proposes to understand cyber conflict as an evolving process driven by two factors: the way in which digital space is configured and the way in which tactical, organizational, strategic, and doctrinal characteristics related to cyber have been included in the field of national and international security. Both tend to encourage offensive behavior but also demonstrate features pointing to restraint.

Title: The Damoclean Sword of Offensive Cyber: Policy Uncertainty and Collective Security
Author: Leuprecht, Christian
Additional Author: Szeman, Joseph
Additional Author: Skillicorn, David B.
Published: 2019
Notes: Cyberspace is a new domain of operation, with its own characteristics. Cyber weapons differ qualitatively from kinetic ones: they generate effects by non-kinetic means through information, technology, and networks. Their properties, opportunities, and constraints are comparable to the qualitative difference between conventional and nuclear weapons. New weapons and their target sets in a new domain raise a series of unresolved policy challenges at the domestic, bilateral, and international levels about deterrence, attribution, and response. They also introduce new risks: uncertainty about unintended consequences, expectations of efficacy, and uncertainty about both the target's and the international community's response. Cyber operations offer considerable benefits for states to achieve strategic objectives both covertly and overtly. However, without a strategic framework to contain and possibly deter their use, make state and non-state behavior more predictable in the absence of reciprocal norms, and limit their impact, an environment where states face persistent attacks that nonetheless fall below the threshold of armed conflict presents a policy dilemma that reinforces collective insecurity.

Title: The Anglo-American Military Relationship : Institutional Rules, Practices, and Narratives
Author: Rees, Wyn

Notes: The Anglo-American military relationship is a vital yet neglected area of study. This article argues that the British military have actively cultivated a relationship with the U.S. military that has contributed to the longevity of the broader so-called ‘Special Relationship’, even in the Trump era. The article contends that the complexities of the military relationship can best be captured by the theoretical lens provided by Lowndes and Roberts that combines different strands of institutionalism to focus on rules, practices, and narratives. The intense linkages between the United States and United Kingdom have become routinized, enabling them to adapt their peacetime cooperation to conflicts, and thereby address post-Cold War security challenges. The article draws upon semi-structured interviews with senior British military officers as well as policy documents to explore how these patterns of collaboration have become ingrained in patterns of both thinking and behavior.

JAPAN--NATIONAL SECURITY
Title: A New Spear in Asia: Why Is Japan Moving toward Autonomous Defense?
Author: Fatton, Lionel P.
Published: 2019
Notes: Japan is on the verge of what would be a dramatic shift in defense posture. The ‘spear and shield’ structure of the US–Japan alliance, at the center of its security policy for most of the postwar era, is being revamped by a move toward autonomous defense. Why would a country confined to a largely passive and Americanocentric posture for more than half a century suddenly change course? The author argues that autonomy is for Japan the only way out of an unprecedented ‘entrapment-abandonment dilemma’: any attempt to prevent defection by the United States in the face of an increasingly assertive China heightens to an unacceptable level the risk of Japan being dragged into a US-led conflict in the Korean Peninsula, and vice versa. Japan’s ability to wield the spear would likely have destabilizing consequences for the whole Asia-Pacific region.

Title: Staying Alive by Overeating? The Enduring NATO Alliance at 70
Author: Deni, John R.
Published: 2019
Notes: NATO's endurance is unique relative to alliances and other intergovernmental organizations of the post-Westphalian system. The degree to which NATO endures or indeed thrives appears to be a function of the continued relevance of the old security agenda and the concomitant importance of the new agenda that member states have thrust upon it. The paradox is that it remains increasingly difficult for NATO to achieve its objectives in both spheres - that is, in terms of adequately deterring Russia and assuring the newest member states of Eastern Europe, while simultaneously safeguarding the south from an array of sub-state or non-state actor challenges.

Title: NATO's Southern Flank and the Threat of Disruption
Author: Marquina, Antonio
Published: 2019
Notes: The article explains the NATO approach to the Mediterranean after the Cold War and the different initiatives launched since 1994, their lack of conceptual consistency and their limitations. It explains first the lack of a strategy for the Med once the NATO Southern Flank lost its raison d'etre. Later, the article explains the pretension to create a 'genuine partnership' and how it was a failure given the practical contradictions. The Arab revolutions were the swan song of the initiative. The embraced NATO regional order for the MENA collapsed and the importance of NATO Southern Flank reappeared. After that, the article explains the new attempts for designing some consistent policies for a broader Med in a new regional environment, the inertias and their lack of credibility. Projecting stability without a NATO strategy for the Med, shared with partners, weakens and limits the reach of the practical initiatives. In this regard, the new approach approved at the NATO Brussels summit of July 2018 is not convincing.

Title: 'Guardian of the International Order'? NATO's Contested Identity, the Discourses of Secretaries General, and the Ukraine Crisis
Author: Boller, Florian
Published: 2018
Notes: This article examines the role of NATO Secretaries General within the transatlantic security community in the wake of the 2014 Ukraine crisis. Drawing on a social constructivist perspective, the comparative discourse analysis of Rasmussen and Stoltenberg offers important insights regarding the role of a non-governmental actor in transatlantic relations. So far, research on transatlantic relations rarely investigated the discourses of NATO Secretaries General. The analysis shows that despite increased attention toward collective defence, both Secretaries General argued for an alliance, which is engaged not only in regional but also global affairs. As Eastern European NATO allies, especially Poland and the Baltic states, embrace divisive notions of the alliance’s self and perceived threats, the security community’s collective identity remains contested.

Author: Wieslander, Anna

Notes: From 2013 onward, Sweden and Finland gradually distinguish themselves from all other NATO partners in order to meet the growing challenge how to defend the Baltics. In this analysis, the concept of 'informal ally', in contrast to 'formal ally', is introduced. A synthesized analytical framework is used to evaluate the process of ever closer partner cooperation and its shifting focus from cooperative security to collective defense. For NATO, the concept of informal allies is central to address. How do informal allies impact NATO in decision-making, operational planning and crisis response? How can NATO balance in solving its core tasks efficiently, without undermining itself as a multilateral institution?

Author: Goldgeier, James
Published: 2019
Notes: The election of Donald Trump as president of the USA has raised questions about America's commitment to the alliance given his ongoing criticisms of allies, particularly regarding their defense spending. On the other hand, support for the alliance remains strong throughout the bureaucracy, in Congress, and among the public. Two trends, however, cast doubt on the robustness of US support for NATO. One is Trump's assault on the post-World War II order by championing hyper-nationalism and economic protectionism. The other is the deepening partisan divide emerging in US public opinion data on favorable views of NATO shaped by presidential rhetoric.

Title: NATO Nuclear Adaptation since 2014: The Return of Deterrence and Renewed Alliance Discomfort
Author: Larsen, Jeffrey A.
Published: 2019
Notes: For most of the post-Cold War era, modernization for NATO has meant a reduced role for nuclear weapons and an enhanced role for crisis management policy and politico-diplomatic partnership. This NATO approach advanced cohesion among allies, some of which were politically uncomfortable with if not borderline opposed to nuclear deterrence. Allied comfort is now under siege, however. Russian military doctrine threatens the early use of nuclear weapons, and states such as Iran and North Korea expose fault lines in the nuclear arms control regime that in recent years has sought to further the full abolition of nuclear weapons. NATO finds itself challenged by the twin requirements of ensuring credible deterrence and meeting the concerns of Alliance members who thought reliance on nuclear weapons was a thing of the past.

NUCLEAR DETERRENCE--USA
Title: Nuclear Deterrence in a New Age
Author: Payne, Keith B.
Published: 2018
Notes: For over two decades since the end of the Cold War, US nuclear policy has been based on a general belief that nuclear deterrence, and thus also nuclear weapons, are of rapidly declining value because international relations had moved toward a much more benign and enduring stage of history. Nuclear weapons supposedly had little or no remaining role to play in US security; the only real questions were how, and how quickly could the United States lead the world to nuclear disarmament. The end of the Cold War, which left the United States as the only standing Superpower inspired this view of history, nuclear deterrence, and nuclear weapons. With the nuclear resurgence of Russia, the rise of China, the mounting nuclear threats from North Korea and potentially Iran, that foundational belief underlying US inattention to its nuclear arsenal is now a manifest fiction, and US nuclear policy must confront, and adjust to a very different reality.

PEACE-BUILDING
Title: From Liberal Peacebuilding to Stabilization and Counterterrorism
Author: Karlsrud, John
Published: 2019
Notes: Since the end of the Cold War, international interventions have increasingly been deployed to deal with internal conflict. Liberal peacebuilding has been a guiding concept for many of these interventions, in particular those deployed by the UN. This article argues that liberal peacebuilding is waning in importance, both as a guiding concept and in practice. After long engagements in Afghanistan and the enduring effects of the financial crisis, Western states are shifting their strategy from liberal peacebuilding to stabilization and counterterrorism. In Africa, regional ad hoc coalitions set up to fight terrorists and other armed groups are on the rise, and progressively included in UN peacekeeping operations. To examine these shifts more closely, the article focuses on the crisis in Mali since 2012 and the growing Western security presence in neighbouring Niger. The article concludes that the turn from liberal peacebuilding to stabilization and counterterrorism is likely to be counterproductive, as it will lead to more oppressive governments and more disillusioned people joining the ranks of opposition and terrorist groups, as well as undermine the UN in general and UN peace operations in particular.

SCANDINAVIA--MILITARY RELATIONS
Title: The Rise, Fall and Resurgence of Nordic Defence Cooperation
Author: Saxi, Hakon Lunde
Published: 2019
Notes: After the end of the Cold War the Nordic states gradually began to work together on military issues beyond UN peacekeeping operations, including in NATO operations, on training and education, as well as on armament development and acquisition. Between 2006 and 2013 these efforts reached their aspirational and rhetorical zenith, as the Nordic states agreed in principle to integrate their armed forces closely. The main catalyst was the conviction that small states could no longer maintain balanced and modern military forces on a purely national basis. The core countries in this integrationist experiment were Norway, Sweden and Finland. The integrationist idea soon faced insurmountable difficulties and expensive setbacks, leading to its quiet abandonment by early 2014. At approximately the same time, the Ukrainian crisis caused a change in the Nordic states' perception of Russia, from a difficult partner to a strategic challenger. The need to work together to meet Russia's revisionist challenge in the Nordic–Baltic region produced a resurgence in Nordic defence cooperation, focused on making the Nordic armed forces able to operate together in a crisis rather than full-blown defence integration. Nordic cooperation today serves as a complement to NATO, the EU and enhanced bilateral cooperation with the major Western states.

Author:  Filiu, Jean-Pierre
Published:  2019
In:  POLITIQUE INTERNATIONALE, no. 163, printemps 2019, p. 177-188.
Notes: Eight years ago, Syria began a civil war that has yet to end. The impact has been catastrophic in every regard: approximately half a million dead, at least a million wounded - often seriously or mutilated - tens of thousands of people 'disappeared', several million refugees who have fled their homes to seek shelter either inside or outside the country, infrastructures ravaged, a health care system in ruins ... Responsibility for this nightmare can be attributed to multiple sources. The first is clearly the regime of Bashar al-Assad, who stopped at nothing to ensure that he remained in power. But the Syrian people were also the victims of calculations by regional and global powers. Damas benefited from massive support from Iran and Russia while the Americans and Europeans endlessly dragged their feet, Turkey and the Gulf states readily supported the anti-Assad - and often ultra-radical - militia, to the detriment of the democratic opposition. Plus of course there has been the bloody ride of Daesch.

Notes: If grand strategy is a state's theory of how to produce security for itself, what should the U.S. grand strategy be toward Iran? This is an important question that has only grown since the Trump administration announced it would not recertify Iran under the Joint Comprehensive Plan of Action (JCPOA). This article lays out four options: rollback, offshore balancing, retrenchment, and engagement. Each strategy has its merits as well as its drawbacks.

WOMEN AND WAR
Title: Conflict, Peace, and the Evolution of Women's Empowerment
Author: Webster, Kaitlyn
Additional Author: Chen, Chong
Additional Author: Beardsley, Kyle
Published: 2019
Notes: How do periods of conflict and peace shape women’s empowerment around the world? While existing studies have demonstrated that gender inequalities contribute to the propensity for armed conflict, the authors consider how the anticipation and realization of armed conflict shape women’s opportunities for influence in society. Some scholars have pointed to the role that militarization and threat play in entrenching male dominance, while others have argued that periods of warfare can upend existing gender hierarchical orders. The authors posit mechanisms by which the preparation for and experiences during war affect change in women’s empowerment. They develop and test observable implications using cross-national data from 1900 to 2015. They find that, at least in the short and medium term, warfare can disrupt social institutions and lead to an increase in women’s empowerment via mechanisms related to role shifts across society and political shifts catalyzed by war. Reforming institutions and mainstreaming gender during peace processes stand to have important legacies for gender power relations in postconflict societies, though much more may be needed for more permanent change.

La guerre au Yemen est entrée dans sa cinquième année et s’est complexifiée. Affrontements tribaux et oppositions de puissances régionales s’y entremêlent. Le pays est morcelé et la situation humanitaire ne cesse de s’aggraver. Les accords signés à Stockholm en décembre 2018 entre le gouvernement d’Abd Rabbo Mansour Hadi et les rebelles houthis peinent à produire des effets sur le terrain. Alors que le conflit s’enlise, les limites de l’action onusienne sont patentées.

AIR POWER--HISTORY
Title: Air Power and Warfare : A Century of Theory and History [electronic resource]
Author: Biddle, Tami Davis
Institution: US Army War College. Strategic Studies Institute (US)
Published: Carlisle, PA : U.S. Army War College, 2019
Physical Description: 1 online resource (xv, 82 pages)
Notes: Bibliography: p. 69-82.
Notes: The author analyzes here the historical record of air power over the past 100 years. Her monograph, designed for the student of strategy, is intended to provide both a concise introduction to the topic and a framework for thinking intelligently about air power, particularly aerial bombing. Her primary aim is to discern the distinction between what has been expected of air power by theorists and military institutions, and what it has produced in the crucible of war. Aerial bombing, the author argues, is a coercive activity in which an attacker seeks to structure the enemy's incentives - using threats and actions to shape and constrain the enemy's options, both perceived and real. It is an important and much-utilized military instrument for both deterrence and compellence. In addition, it is a powerful tool in the arsenal of the joint warfighter. Its ability to achieve anticipated results, however, varies with circumstances. Students of strategy must be able to discern and understand the conditions under which aerial bombing is more or less likely to achieve the results expected of it by those who employ it.

Notes: Foreign analysts have only begun to explore the contents, drivers, and possible implications of Xi's campaign to restructure the PLA. Many issues remain shrouded in uncertainty and warrant further examination. These include: what impacts the reforms are having on PLA operations, training, and logistics; the prospects for the ground forces as the reforms' nominal biggest loser, as well as the other services; challenges the PLA is facing in cultivating operational commanders; the structure, roles, and missions of the SSF and JLSF; how the downsizing is being carried out, and what impact it might have on social stability; the implications of reform for Party control over, and Xi's influence within, the PLA; whether and how the reforms will improve coordination between the PLA and the civilian science and technology sector; what the implications might be for the defense acquisition process. This volume explores these and other dimensions of China's military reforms as they were planned and implemented between 2013 and 2018.

DEMOCRACY
Title: The Rise of Democracy : Revolution, War and Transformations in International Politics since 1776 [electronic resource]
Author: Hobson, Christopher
Published: Edinburgh : Edinburgh University Press, 2015
Physical Description: 1 online resource (254 pages)
Notes: Bibliography: pages 221-244. Includes index.
Notes: Little over 200 years ago, a quarter of a century of warfare with an 'outlaw state' brought the great powers of Europe to their knees. That state was the revolutionary democracy of France. In the intervening period, there has been remarkable transformation in the way democracy is understood and valued - today, it is the non-democratic states that are seen as rogue regimes. In this book, the author looks at the historical contrast between the strongly negative perceptions of democracy in the 18th century and the very high degree of acceptance and legitimacy in contemporary international politics. Building on this, the author looks at the role of democracy in international relations: in the past, its present role and the likely future challenges.

DEMOCRATIZATION
Title: Dictators and Democrats: Masses, Elites, and Regime Change [electronic resource]
Author: Haggard, Stephan
Additional Author: Kaufman, Robert R.
Physical Description: 1 online resource (396 pages)
Notes: Bibliography. Includes index.
Notes: From the 1980s through the first decade of the twenty-first century, the spread of democracy across the developing and post-Communist worlds transformed the global political landscape. What drove these changes and what determined whether the emerging democracies would stabilize or revert to authoritarian rule? This book takes a comprehensive look at the transitions to and from democracy in recent decades. Deploying both statistical and qualitative analysis, the authors engage with theories of democratic change and advocate approaches that emphasize political and institutional factors. While inequality has been a prominent explanation for democratic transitions, the authors argue that its role has been limited, and elites as well as masses can drive regime change. Examining seventy-eight cases of democratic transition and twenty-five reversions since 1980, the authors show how differences in authoritarian regimes and organizational capabilities shape popular protest and elite initiatives in transitions to democracy, and how institutional weaknesses cause some democracies to fail.

DICTATORSHIP

Additional Author: Tomini, Luca
Published: Cham, Switzerland: Palgrave MacMillan, 2019
Physical Description: 1 online resource (146 pages)
Series: Challenges to Democracy in the 21st Century
Notes: Includes index.
Notes: This book deals with post-Cold War processes of autocratization, that is, regime change towards autocracy. While these processes are growing in number and frequency, autocratization remains a relatively understudied phenomenon, especially its most recent manifestations. In this volume, the authors offer one of the first cross-regional comparative analyses of the recent processes of regime change towards autocracy. Building on an original conceptual framework, the two authors engage in the empirical investigation of the spreading of this political syndrome, of the main forms that it takes, and of the modes through which it unfolds in countries ruled by different political regimes, with different histories and belonging to different regional contexts. The research is conducted through a mix of research techniques that include descriptive statistical analysis, Qualitative Comparative Analysis and case study.

HUMANITARIAN INTERVENTION
Title: International Intervention in the Post-Cold War World: Moral Responsibility and Power Politics [electronic resource]
Published: Abingdon, UK: Routledge, 2015
Physical Description: 1 online resource (xii, 332 pages)
Notes: International intervention on humanitarian grounds has been a contentious issue for decades. First, it pits the principle of state sovereignty against claims of universal human rights. Second, the motivations of intervening states may be open to question when avowals of moral action are arguably the fig leaf covering an assertion of power for political advantage. These questions have been salient in the context of the Balkan and African wars and U.S. policy in the Middle East. This book undertakes a serious, systematic, and broadly international review of the issues.

MEDIATION
Title: How to Resolve Conflict: A Practical Mediation Manual [electronic resource]
Author: Gilman, James Earl
Published: Lanham, MD: Rowman & Littlefield, 2017
Physical Description: 1 online resource (xii, 133 pages)
Series: Peace and Security in the 21st Century Series
Notes: A guide to the practice of mediation as a means of resolving conflict, this short how-to manual includes all the resources needed to teach and train mediators in the skills of conflict resolution. It explains the conceptual framework of conflict and peacemaking, the stages and steps of the mediation process, and the resources necessary to conduct mediation sessions, including practice through role-playing. The book is divided into three parts: theory, process, and practice. Part I provides a conceptual framework for understanding conflict and mediation. It discusses the sources of conflict, the dynamics of power imbalances, how mediation counteracts them, and familiar styles for managing conflicts. Part II describes the stages of the mediation process. It begins with orientation and preparation for the mediation session before outlining each of the five stages of the mediation process along with a range of communication skills crucial to the success of each stage. Part III focuses on several familiar areas of human experience in which the practice of mediation is common, such as family and domestic mediation, business and organizational mediation, international mediation, and education. These chapters include customary forms and techniques used in resolving conflicts. The final chapter includes materials to manage and conduct mediation role-playing exercises.

MILITARY ART AND SCIENCE
Title: Routledge Handbook of Defence Studies [electronic resource]
Additional Author: Galbreath, David J., ed.
Additional Author: Deni, John R., ed.
Published: Abingdon, UK : Routledge, 2018
Physical Description: 1 online resource (xiv, 397 pages)
Notes: Includes index.
Notes: Defence studies is a multi-disciplinary study of how agents, predominantly states, prepare for and go to war. Whereas security studies has been broadened and stretched to cover at times the near totality of international and domestic affairs, and war studies has come to mean more than just operations and tactics but also experiences and outcomes, defence studies remains a coherent area of study primarily aimed at how defence policy changes over time and in relation to stimulating factors such as changes in power, strategy and technology. This new Handbook offers a complete landscape of this area of study and contributes to a review of defence studies in terms of policy, security and war but also looks forward to new challenges to existing conceptions of defence and how this is changing as states and their militaries also change. The volume is divided into four thematic sections: defence as policy; defence practice; operations and tactics; and contemporary defence issues.

This book, a blend of memoirs and scholarship, takes us back to the decade when those momentous decisions were made. Former senior officials from the United States, Russia, Western and Eastern Europe who were directly involved in the decisions of that time describe their considerations, concerns, and pressures. Notes: The modern age of naval warfare began with the combination of steam power, iron warships, and modern artillery, which launched an intense period of international competition. Tracing naval warfare from the 1860s into the future, the author provides a dynamic account of strategy and warfare worldwide. He focuses on the interplay of technological development, geopolitics and resource issues to assess not only the role of leading powers but all those involved in naval conflict. Emphasizing conflict and changes since 1945 and, notably, since the end of the Cold War, the author considers possible future developments of navies, their challengers, and the geopolitics of maritime power.

PEACEKEEPING FORCES--EVALUATION
Title: Evaluating Peacekeeping Missions : A Typology of Success and Failure in International Interventions [electronic resource]
Author: Martin-Brule, Sarah-Myriam, 1979-
Published: Abingdon, UK : Routledge, 2017
Physical Description: 1 online resource (xvii, 153 pages)
Series: Cass Series on Peacekeeping
Notes: Includes index.
Notes: This book offers a new perspective on peace missions in intra-state wars, based on comparative field research. In theoretical terms, this book proposes a new definition of peace operation success based on two crucial elements: the re-establishment of order and the accomplishment of the mandate. The work presents a new typology for assessing peace operations as failures, partial failures, partial successes or successes. This focus on 'blurry' outcomes provides a clearer theoretical framework to understand what constitutes successful peace operations. It explains the different outcomes of peace operations (based on the type of success/failure) by outlining the effect(s) of the combination of the key ingredient-strategy and the type of interveners. Empirically, this book tests the saliency of the theoretical framework by examining the peace operations which took place in Somalia, Liberia, and Sierra Leone. This book refutes the classification of these three cases as the 'worst' context for 'transitional politics' and demonstrates that peace operations may succeed, partially or totally, in challenging contexts and that the diverse outcomes are better explained by the type of intervener, and the strategy employed than by the type of context. This work shows that, for a peace operation in an intra-state war, the adoption of a deterrence strategy works best for re-establishing order, while the involvement of a great power facilitates the accomplishment of the mandate.

POPULISM--HISTORY
Title: Critical Theory and Authoritarian Populism [electronic resource]
Additional Author: Morelock, Jeremiah, ed.
Published: London: University of Westminster Press, 2018
Physical Description: 1 online resource (xxxvii, 259 pages)
Series: Critical, Digital and Social Media Studies ; 9
Notes: Includes index.
Notes: After President Trump’s election, Brexit and the widespread rise of far-right political parties, much public discussion has intensely focused on populism and authoritarianism. In the middle of the twentieth century, members of the early Frankfurt School prolifically studied and theorized fascism and anti-semitism in Germany and the United States. In this volume, leading European and American scholars apply insights from the early Frankfurt School to present-day authoritarian populism, including the Trump phenomenon and related developments across the globe. Chapters are arranged into three sections exploring different aspects of the topic: Theories, historical foundations, and manifestations via social media. Contributions examine the vital political, psychological and anthropological theories of early Frankfurt School thinkers, and how their insights could be applied now amidst the insecurities and confusions of twenty-first century life. The many theorists considered include Adorno, Fromm, Lowenthal and Marcuse, alongside analysis of Austrian Facebook pages and Trump's tweets and operatic media drama.

The field of peacemaking is in turbulent change. There are more peacemaking actors than before but fewer success stories, and an increasing number of violent conflicts tend to resist negotiated agreements. Tools and practices created for traditional inter- and intra-state conflicts have become ineffective and revision of old mediation practices is called for. This book examines how the private peacemaking organisations have faced this challenge. In the 21st century, private peacemakers have become a central part of peace diplomacy and have appeared as flexible actors whose innovative thinking paves the way for reconsidering and reinventing old practices of mediation. Instead of emphasizing the act of resolution, a new emphasis is given to the transformation of violence into a peace system, the complexity of conflict and the inadequateness of rational management. Furthermore, this shift has brought civic society actors from the field of reconciliation to the field of peace mediation. This new pragmatic approach under development can be called dialogic mediation.

RUSSIA (FEDERATION)--FOREIGN RELATIONS
Title: Routledge Handbook of Russian Foreign Policy [electronic resource]
Additional Author: Tsygankov, Andrei P., ed.
Published: Abingdon, UK : Routledge, 2018
Physical Description: 1 online resource (439 pages)
Notes: Providing a comprehensive overview of Russia’s foreign policy directions, this handbook brings together an international team of scholars to develop a complex treatment of Russia’s foreign policy. The chapters draw from numerous theoretical traditions by incorporating ideas of domestic institutions, considerations of national security and international recognition as sources of the nation’s foreign policy. Covering critically important subjects such as Russia’s military interventions in Ukraine and Syria, the handbook is divided into four key parts: Part I explores the social and material conditions in which Russia’s foreign policy is formed and implemented. Part II investigates tools and actors that participate in policy making including diplomacy, military, media, and others. Part III provides an overview of Russia’s directions towards the United States, Europe, Asia, the Middle East, Eurasia, and the Arctic. Part IV addresses the issue of Russia’s participation in global governance and multiple international organizations, as well as the Kremlin’s efforts to build new organizations and formats that suit Russia’s objectives.

RUSSIA (FEDERATION)--FOREIGN RELATIONS--CHINA
Title: China and Russia : The New Rapprochement
Author: Lukin, Alexander
Published: Cambridge, UK : Polity Press, 2018
Physical Description: 1 online resource (220 pages)
Notes: Includes index.
Notes: With many predicting the end of US hegemony, Russia and China’s growing cooperation in a number of key strategic areas looks set to have a major impact on global power dynamics. But what lies behind this Sino-Russian rapprochement? Is it simply the result of deteriorated Russo-US and Sino-US relations or does it date back to a more fundamental alignment of interests after the Cold War? The author answers these questions, offering a deeply informed and nuanced assessment of Russia and China’s ever-closer ties. Tracing the evolution of this partnership from the 1990s to the present day, he shows how economic and geopolitical interests drove the two countries together in spite of political and cultural differences. Key areas of cooperation and possible conflict are explored, from bilateral trade and investment to immigration and security. Ultimately, the author argues that China and Russia’s strategic partnership is part of a growing system of cooperation in the non-Western world, which has also seen the emergence of a new political community: Greater Eurasia.

STRATEGIC DEFENSE INITIATIVE
Author: Dietl, Ralph
Published: Lanham, MD : Lexington Books, 2018
Physical Description: 1 online resource (203 pages)
Notes: Bibliography. Includes index.
Notes: The Nuclear and Space Talks revolutionized arms control. The Cold War endgame commenced with the umbrella negotiations that linked START and INF negotiations to a regulation on the weaponization of space. This volume reveals a US grand strategy to replace deterrence with a collective security order. In brief, the superpowers prepared the ‘velvet revolution’ that eliminated the Cold War structures. Neither containment nor convergence offers a valid explanation of the Cold War endgame. Co-creation is the key to decipher the end of the Cold War. NATO Europe challenged the transformation of bipolarity. The European NWS resisted to a multilateralization of strategic arms control. In Europe the classic Cold War thinking survived the fall of the Iron Curtain. European conservatism contributed to the geopolitical catastrophe of the first order: the downfall of the Soviet Union.

STRATEGY
Title: Theory of Strategy [electronic resource]
Author: Gray, Colin S.
Published: Oxford, UK : Oxford University Press, 2018
Physical Description: 1 online resource (xii, 162 pages)
Notes: This book provides a short and accessible introduction to the theory of strategy, examines the general theory of strategy in accordance with 23 key principles and explains its nature, functions, and intended consequences. The book makes the radical argument that the familiar structure of strategy’s general theory (political ends, strategic ways, military means - and assumptions) holds as sound for security at all times and in all places, of human necessity. Strategy is ever-varying in its character, but not in its nature, which is unchanging.

TERRORISM
Title: Terrorism : What Everyone Needs to Know [electronic resource]
Author: Sandler, Todd.
Published: Oxford, UK : Oxford University Press, 2018
Physical Description: 1 online resource (209 pages)
Notes: The causes and consequences of terrorism are matters of considerable debate and great interest. Spectacular events are recognized by their dates, including the 9/11 attacks in New York and Washington, and the 7/7 London bombings. Many other attacks, including those in non-Western countries, receive far less attention even though they may be more frequent and cumulatively cause more casualties. The author provides here a broad overview of a persistently topical topic. The general issues he examines include what terrorism is, its economic consequences, and the future of terrorism. He focuses on the modern era and how specific motivations, ranging from nationalism/separatism to left- or right-wing extremism or religious ideals, and general conditions, such as poverty and inequality or whether a country is democratic or authoritarian, affect the frequency and costs of terrorism.

TURKEY--FOREIGN RELATIONS
Title: The Foreign Policy of Modern Turkey : Power and the Ideology of Eurasianism [electronic resource]
Author: Tufekci, Ozgur
Published: London : I. B. Tauris, 2017
Physical Description: 1 online resource (ix, 242 pages)
Series: Library of Modern Turkey ; 22
Notes: In the last three decades, Turkey has attempted to build close relationships with Russia, Iran and the Turkic World. As a result, there has been ongoing debate about the extent to which Turkey’s international relations axis is shifting eastwards. The author argues that Eurasianist ideology has been fundamental to Turkish foreign policy and continues to have influence today. He first explores the historical roots of Eurasianism in the 19th century, comparing this to Neo-Eurasianism and Pan-Slavism. The Ozal era (1983-1993), the Cem era (1997-2002) and Davutoglu era (since 2003) are then examined to reveal how foreign policy making has been informed by discourses of Eurasianism, and how Eurasianist ideas were implemented through internal and external socio-economic and political factors.

WAR CRIMES
Title: War Crimes : Causes, Excuses, and Blame [electronic resource]
Author: Talbert, Matthew
Additional Author: Wolfendale, Jessica, 1973-
Published: Oxford, UK : Oxford University Press, 2019
Physical Description: 1 online resource (168 pages)
Notes: Bibliography. Includes index.
Notes: The authors propose an original theory of the causes of war crimes and the responsibility of war crimes perpetrators. In the first half of the book, they challenge accounts that explain war crimes by reference to the situational pressure endured by military personnel, including peer pressure, combat stress, and propaganda. The authors propose an alternative theory that explains how military personnel make sense of their participation in war crimes through their self-conceptions, goals, and values. In the second half of the book, the authors consider and reject theories of responsibility that excuse perpetrators on the grounds that situational pressures often encourage them to believe that their behavior is permissible. Such theories of responsibility are unacceptably exculpatory, implying it is unreasonable for victims of war crimes to blame their attackers. By contrast, the authors argue that perpetrators of war crimes may be blameworthy if their actions express objectionable attitudes towards their victims, even if they sincerely believe that what they are doing is right.

WARFARE, CONVENTIONAL
Title: Land Warfare since 1860 : A Global History of Boots on the Ground [electronic resource]
Author: Black, Jeremy, 1955-
Published: Lanham, MD : Rowman and Littlefield, 2019
Physical Description: 1 online resource (ix, 281 pages)
Notes: Bibliography. Includes index.
Notes: This book traces the history of land warfare since the start of the Crimean War in 1853. Although it has always been critical to the outcome of conflicts worldwide, land warfare has become undervalued in comparison to air power in modern military thinking. In practice, land warfare was crucial during the American Civil War, the two world wars, and the conflicts of the Cold War. Indeed, the revival of great power confrontation has led to an urgent need to re-examine the entire contemporary period. Looking to the future, the book shows convincingly that we must consider the nature of the military for non-state actors as well as for the major powers. Ultimately, the author contends, there is no substitute for the control over territory provided by boots on the ground.
