Iran’s Nuclear Program
Thematic Bibliography no. 1/12

Le programme nucléaire iranien
Bibliographie thématique no. 1/12
How to borrow items from the list below:

As a member of the NATO HQ staff you can borrow books (Type: M) for one month, journals (Type: ART) and reference works (Type: REF) for one week. Individuals not belonging to NATO staff can borrow books through their local library via the interlibrary loan system.

How to obtain the Multimedia Library publications:

All Library publications are available both on the NATO Intranet and Internet websites.

Comment emprunter les documents cités ci-dessous:

En tant que membre du personnel de l'OTAN vous pouvez emprunter les livres (Type: M) pour un mois, les revues (Type: ART) et les ouvrages de référence (Type: REF) pour une semaine. Les personnes n'appartenant pas au personnel de l'OTAN peuvent s'adresser à leur bibliothèque locale et emprunter les livres via le système de prêt interbibliothèques.

Comment obtenir les publications de la Bibliothèque multimédia:

Toutes les publications de la Bibliothèque sont disponibles sur les sites Intranet et Internet de l'OTAN.

Year: 2011
Type: M

* This list contains material received as of January 9th, 2012.– Cette liste est arrêtée au 9 janvier 2012.
As Iran's nuclear program continues to evolve, US decisionmakers will confront a series of critical policy choices involving complex considerations and policy trade-offs. These policy choices could include dissuading Iran from developing nuclear weapons and deterring Iran from using its nuclear weapons, if it were to acquire them. To be successful, the United States will need to find ways to influence Iran's calculations of costs and benefits as Iran pursues its national security interests (survival of the regime, protection of the homeland, and expansion of its regional influence). The United States will also need to reassure its partners in the region of the credibility of the US deterrent posture so as to reduce the Gulf Cooperation Council states' potential interest in developing their own nuclear weapons and dissuade Israel from pursuing unilateral military actions or openly declaring its nuclear posture. The US Air Force, supporting combatant commanders, will play a prominent role in implementing the policy choices, and so it needs to prepare by understanding the goals and timelines of potential military tasks and by designing exercises and war games to support different policy choices.

Since Iran's 1979 Revolution, the West has struggled to understand what drives the Islamic Republic and how to deal with it. Difficult to engage yet impossible to ignore, Iran presents the world's most complex foreign policy dilemma. This book offers a comprehensive but concise overview of Iran's politics, economy, military, foreign policy, and nuclear program. It chronicles US-Iran relations under six American presidents and probes five options for dealing with Iran. Organized thematically, the book provides top-level briefings by 50 experts on Iran (both Middle Eastern and Western authors) as well as a handful of rising talent. It provides hard factual
Iran and Nuclear Weapons: Protracted Conflict and Proliferation - Abingdon, UK: Routledge.
xii, 156 p.: ill.; 24 cm.
(Routledge Global Security Studies)
ISBN: 9780415453073
Author(s):
1. Khan, Saira
Subject(s):
1. NUCLEAR WEAPONS--GOVERNMENT POLICY--IRAN
2. NUCLEAR NONPROLIFERATION--IRAN
3. USA--FOREIGN RELATIONS--IRAN
4. IRAN--FOREIGN RELATIONS--USA
Notes:
Bibliography: p. 138-151. Includes index.
'This book investigates what is driving Iran's nuclear weapons program in a less-hostile regional environment, using a theory of protracted conflicts to explicate proliferation. It underscores the importance of protracted conflicts in proliferation decisions, and underpinning this is the assumption that non-proliferation may be achieved through the termination of intractable conflicts. The aims of this work are to demonstrate that a state's decision to acquire nuclear weapons depends largely on its engagement in protracted conflicts, which shows not only that the presence of nuclear rivals intensifies the nuclear ambition, but also that non-nuclear status of rival states can promote non-proliferation incentives in conflicting states inclined to proliferate.'

'Since suspicions arose six years ago about military intentions behind Iran's nuclear programme, an international coalition led by the United States of America has tried in vain to pressure, entice and threaten the Islamic Republic into halting uranium enrichment and reprocessing. Today, the issue has become a symbol of national independence in Iran. And the Islamic Republic is not only further advanced in terms of its potential capability for developing a nuclear bomb. It has also acquired a pivotal position with regard to all the major conflicts in the region - from the future stability of Iraq, Afghanistan and Lebanon to the Israeli-Palestinian conflict. Hence the need for an alternative strategy is obvious. It must start from the recognition that progress on the nuclear issue can only be made if the West ceases to focus on the nuclear problem alone. Instead Western governments must broaden their approach to take in the overall relationship, consider possible overlapping interests with Iran and offer cooperation, detente and even partnership as the basis on which to address the nuclear concerns. This will take courage as well as patience. Despite much hysteria in the media, there is time to try a fresh approach. Iran is still far from nuclear weapon status. Should it nevertheless obtain it, the West and its allies in the region should remember that deterrence, containment and detente have been effective before in dealing with a much more powerful and potentially much more dangerous opponent, the late Soviet Union.'
This paper explains how Iran developed its nuclear programme to the point where it threatens to achieve a weapons capability within a short time frame, and analyses Western policy responses aimed at forestalling that capability. Key questions are addressed: will the world have to accept an Iranian uranium-enrichment programme, and does having a weapons capability mean having the bomb? For nearly two decades, Western strategy on the Iran nuclear issue emphasised denial of supply. Since 2002 there has also been a demand-side dimension to the strategy, aimed at changing Iran's cost-benefit calculations through inducements and pressure. But the failure of these policies to prevent Iran from coming close to achieving a nuclear-weapons capability has promoted suggestions for fallback strategies that would grant legitimacy to uranium enrichment in Iran in exchange for intrusive inspections and constraints on the programme. The paper assesses these 'second-best' options in terms of their feasibility and their impact on the proliferation risks of diversion of nuclear material and knowledge, clandestine development and NPT break-out, and the risk of stimulating a proliferation cascade in the Middle East and beyond. It concludes that the risks are still best minimised by reinforcing the binary choice presented to Iran of cooperation or isolation, and strengthening denial of supply.

plus souterraine, à toutes les zones de crise de la région, qu'il s'agisse de l'Irak ou du Liban, de l'Asie Centrale et du Caucase. Face à ces prétentions, nos réponses ne sont pas du tout à la hauteur des enjeux. Les règles qui vont régir les rapports de forces et les relations nucléaires au XXIème siècle ne sont pas encore écrites : veut-on, demande ici l'auteur, qu'elles le soient par l'Iran ?

'C'est peut-être le visage de notre XXIème siècle qui se dessine en ce moment à travers l'avenir nucléaire de l'Iran. Car, sauf divine surprise, l'année 2008 sera placée sous le signe d'un choix binaire entre le recours aux armes ou l'acceptation de la logique de la prolifération au Moyen-Orient et dans le monde. Nos pays auront donc à se déterminer par rapport à deux options parfaitement catastrophiques. Sera-t-il pire de frapper que de ne pas frapper ? Des frappes aériennes auraient des conséquences positives très limitées et des effets néfastes majeurs; mais la prolifération régionale aurait des effets calamiteux et aucune conséquence positive ... Quelles conclusions politiques nos pays devront-ils tirer de la réponse à cette question ? Il faut certainement tout faire pour éviter de se trouver face à une alternative aussi peu appetissante. Mais l'Iran, en forçant l'allure nucléaire et balistique, a malheureusement conduit à une situation où le temps manque tragiquement.'

The Iran Threat : President Ahmadinejad and the Coming Nuclear Crisis - New York : Palgrave MacMillan.
xx, 284 p. : ill.; 25 cm.
ISBN: 9781403976642
Author(s):
1. Jafarzadeh, Alireza
Subject(s):
1. AHMADINEJAD, MAHMoud
2. IRAN--POLITICS AND GOVERNMENT
3. IRAN--FOREIGN RELATIONS
4. NUCLEAR WEAPONS--IRAN
Notes:
Includes index.
'From the controversial expert who brought Iran's nuclear program to the world's attention in 2002 comes a searing expose of the inner workings and plans of Iran's mullahs. With access to dissident groups inside Iran, the author traces President Ahmadinejad's radical roots and involvement in an organization with terrorist links to his impact on Iran's weapons program.
He reveals new details on Iran's meddling in Iraq and its broader goals for the future of the Middle East. Key revelations include: President Ahmadinejad's radical past, including his reported role as a feared torturer of political prisoners and his zealous mission to deliver the regime its first nuclear bomb; the chilling trend of the military's increasing control of the nuclear program; how Ahmadinejad was handpicked by Iran's mullahs to help create an Islamic Republic in Iraq; the latest covert actions to bury nuclear facilities in tunnels; the story of the front companies Iran used to buy its nuclear technology undetected; original and insightful policy options to end the Iranian threat.'

Bibliography: p. 35-36.
What would be the consequences for international security of an Iran armed with nuclear weapons - be they either demonstrated by nuclear test denotations like North Korea or 'bombs in the basement' like Israel? What power and influence would Iran acquire with nuclear weapons? How would the Gulf states and Israel react? What would the United States do differently in the Gulf to adapt to a nuclear-armed Iran? And what impact would these changes and adaptations by Iran, regional states and the United States have on security and stability in the Gulf?

Subject(s):
1. IRAN--FOREIGN RELATIONS
2. NUCLEAR WEAPONS--IRAN
Notes:
Includes index.

'Alors que tout au long du XIXe siècle l'Iran féodal fut l'enjeu d'une vive compétition des puissances, notamment de la Russie et de la Grande-Bretagne, dès la fin de la Seconde Guerre mondiale il est devenu l'allié privilégié des États-Unis, sous l'égide desquels Reza Pahlavi, le 'roi des rois', aurait voulu faire de l'Iran la principale puissance du golfe Persique. L'autoritarisme repressif du shah et sa megalomanie provoquèrent la réaction du clergé chîte conduit par l'ayatollah Khomeyni et amena en 1979 une République porteuse du fondamentalisme islamique dans le monde. S'alliant avec la Syrie, Teheran s'efforça de jouer un rôle majeur dans le Moyen-Orient, et entra en conflit avec les régimes conservateurs de la région. Vivement opposée aux États-Unis et à Israël, le président Ahmadinejad conteste l'holocauste et se propose de 'rayer Israël de la carte du monde'. L'Iran defia l'Agence internationale de l'énergie atomique, et s'engagea dans un processus d'enrichissement d'uranium pouvant menacer la fabrication de l'arme nucléaire. Que nous réserve l'avenir ? Qu'en sera-t-il du Traité de non-proliferation, déjà affaibli par l'accession à l'arme nucléaire de l'Inde, du Pakistan et de la Corée du Nord ? Un Iran doté des armes de destruction massive représentera une menace directe pour la sécurité de la région du Golfe, voire pour l'existence de l'État hébreu, et cette menace doit être éradiquée. A supposer que l'Iran continue à défier la communauté internationale, les États-Unis et Israël prendront-ils le risque d'une éventuelle intervention militaire pour anéantir les installations nucléaires iraniennes ?'

'Does Iran intend to use nuclear energy technology to develop weapons ? The West's concern stems in part from Iran's uncertain intentions and recent history. This book provides a rare look into the motivations, perceptions, and domestic politics swirling around Iran. The author narrates the recent history of Iran's nuclear program and diplomacy and argues that the central problem is not nuclear technology but rather Iran's
behavior as a revolutionary state with ambitions that collide with the interests of its neighbors and the West.'

Author(s):
1. Cordesman, Anthony H.
2. Al-Rodhan, Khalid R.

Notes:
'This book covers all facets of Iran's weapons of mass destruction. The authors analyze Iran's motivation for acquiring WMD capabilities; the history of its WMD program; its chemical, biological, and nuclear capabilities; and its delivery options, including its missile program, air force, and Revolutionary Guards. They also examine the spectrum of diplomatic and economic sanctions available to make Iran comply with the United Nations Security Council, as well as military options and the different ways Iran might respond. In addition, the authors explore the geostrategic implications of these options on regional stability, energy security, and the struggle against terrorism.'

Iran's Nuclear Program: Realities and Repercussions - Abu Dhabi: Emirates Center for Strategic Studies and Research. xii, 177 p.; 24 cm. ISBN: 9789948008484
Subject(s):
1. NUCLEAR WEAPONS--IRAN
Added entry(s):
1. Emirates Center for Strategic Studies and Research
Notes: Bibliography: p. 157-163. Includes index. 'International suspicion surrounding Iran's nuclear activities was first aroused in the late 1980s and early 1990s. However, it was not until the International Atomic Energy Agency (IAEA) launched an intensive investigation into the Iranian nuclear program in 2002, that it was revealed that Iran had enriched uranium and separated plutonium in undeclared facilities in the absence of IAEA safeguards. In January 2006, Iran began to ignore limitations on nuclear fuel cycle activities yet again, in defiance of the broad opinion of the international community and despite both offers of assistance and the threat of sanctions. This volume represents a collection of expert views, covering Iran's current nuclear capability and its potential to develop atomic weapons; developments in Iran's nuclear program since the 2005 Iranian presidential elections; Israeli foreign policy in relation to Iran; the potential impact of any Iranian nuclear program on GCC security; and the possibility of military action against Iran.'

1. Trean, Claire
Subject(s):
1. IRAN--POLITICS AND GOVERNMENT
2. IRAN--SOCIAL CONDITIONS
3. IRAN--FOREIGN RELATIONS
4. NUCLEAR WEAPONS--IRAN
Notes:
'Les Iraniens aspirent a l'integration dans le monde moderne. Les filles sont eduquees, les jeunes se detournent massivement des pratiques religieuses et s'orientent vers des modes de vie de type occidental. Et pourtant, ce meme peuple a porte a la presidence un extremist islamiste. Elu sur des themes populistes, Mahmoud Ahmadinejad a su tirer parti du mecontentement social et du discredit d'un clerge corrompu. Il renoue avec l'ambition de la revolution khomeyniste de faire de l'Iran le champion de la lutte contre lesingerences etrangeres et de la contestation de l'ordre occidental en general. La plupart de ses compatriotes n'adherent pas a ses slogans anti-occidentaux et anti-israeliens mais il a leur appui sur le dossier nucleaire. Les Iraniens ne supportent pas qu'on veuille les empecher d'accéder a la technologie moderne. Sur ce point - le droit au savoir nucleaire - le consensus est total en Iran. Les Occidentaux devront l'admettre (meme s'ils ont toutes les raisons de croire que le regime cherche plus a maitriser les techniques de fabrication de la bombe que celles de la production d'electrice) ou bien aller a la crise ouverte.'
Iran's Strategic Weapons Programmes: A Net Assessment - Abingdon, UK: Routledge.
128 p. : ill.; 30 cm.
ISBN: 0415385512
Subject(s):
1. NUCLEAR WEAPONS--IRAN
2. CHEMICAL WEAPONS--IRAN
3. BIOLOGICAL WEAPONS--IRAN
4. BALLISTIC MISSILES--IRAN
Added entry(s):
1. International Institute for Strategic Studies (GB)
Notes:
'This dossier provides an objective technical assessment of Iran's nuclear, chemical, and biological weapons capabilities, as well as its ballistic missile programme. It evaluates what is known and what is not known about these capabilities and projects potential future developments. In addition, the dossier provides a history of diplomatic efforts, over the last three decades, to prevent Iran from acquiring a nuclear weapons capability and examines different options for current diplomatic efforts. Each chapter has been written and reviewed by recognised international experts in their respective fields.'

Year: 2005
Type: M
'In October 2003 the Islamic Republic of Iran admitted that it had secretly been producing highly enriched, weapons-grade uranium. This revelation shocked the world, as did Iran's further confession that it had been pursuing a clandestine nuclear program for nearly two decades. Throughout 2004, the UN and leading European nations tried to persuade Tehran to abandon its efforts to gain a nuclear weapons capability. The author lays out here in detail the mullah regime's silent march toward acquiring nuclear weapons. He first describes the nature of the Iranian regime, which evolved from the Islamic revolution of 1979. He then turns to the mechanics of Iran's nuclear program, its acquisitions through the international black market, and the technological problems it has steadily overcome. He also examines Iran's missile program, developed with the help of North Korea, its unconventional weapons, and Tehran's record of fostering terrorism through the auspices of its fanatic Pasdaran military arm. Of special interest in this book is a rare look at a rogue nuclear weapons program that once succeeded. In tracing the development of atomic weapons in his native South Africa, the author provides a grim case example of what the Iranian regime is capable of achieving, as well as a glimpse of the new diaspora of nuclear scientists flung off by the end of Apartheid.'
weapons-related capabilities.'

The IAEA and Iran's Nuclear Programme: Entirely Legitimate or
Clandestine Intent? - [s.l.]: British American Security Information
Council.
9 p.: 30 cm.
(BASIC Paper ; 45)
Author(s):
1. Chamberlain, Nigel
Subject(s):
1. NUCLEAR WEAPONS--IRAN
Added entry(s):
1. British American Security Information Council (GB)
Notes:
'Iran is developing an extensive nuclear programme. The Iranian
Government says it is entirely legitimate and necessitated by
growing energy demands and the need to diversify energy
sources. The Bush administration openly accuses Iran of working
on a clandestine nuclear weapons programme. European
governments have played a more conciliatory role, seeking
greater transparency in exchange for civil nuclear technology
transfer. The International Atomic Energy Agency (IAEA) has
been trying to establish the facts and has called on Iran to
fully account for its activities by the end of the October
2003.'

Notes:
Tensions between Turkey and Israel have been growing, and at the
core of their tensions lies their disagreement over foreign
policies in Iran.

A Nuclear Arms Race in the Middle East : Myth or Reality ?.
(MEDITERRANEAN QUARTERLY, vol. 22, no. 1, Winter 2011, p. 27-40.)
Author(s):
1. Bahgat, Gawdat
Subject(s):
1. NUCLEAR NONPROLIFERATION--MIDDLE EAST
2. NUCLEAR WEAPONS--GOVERNMENT POLICY--IRAN
Notes:
The analysis in this essay focuses on a fundamental question : How
would Arab countries react to a nuclear Iran ? To sum up, an
Iran with nuclear weapons capability is likely to further
destabilize the Middle East, but it is not likely to ignite a
regional nuclear arms race.
The technical and political evidence that Iran is seeking to establish a 'nuclear hedging' capability has gradually increased over the past nine years. The regime in Tehran has continued to insist that its nuclear ambitions are purely civilian in nature and it has resisted the international community's dual-track policy, encompassing both negotiations and sanctions, to persuade Iran to be fully transparent about its nuclear activities and plans, and to suspend work related to uranium enrichment and plutonium separation. While the prospects for a negotiated solution currently appear slim, the regime does not yet appear to have decided whether, or when to produce nuclear weapons and to break out of the Nuclear Non-Proliferation Treaty. It is essential, therefore, to maintain and if necessary to build up the pressure on Iran and to strengthen efforts to disrupt its procurement of technology and materials for its nuclear programme. It is also imperative for the international community to maintain negotiations and also consider alternative diplomatic approaches to enhance the prospects of keeping Iran focused purely on civil nuclear ambitions, while at the same time resolving questions related to the possible military dimensions of Iran's nuclear programme.

Coping with a Nuclearising Iran.
Author(s):
1. Dobbins, James
Subject(s):
1. NUCLEAR WEAPONS--GOVERNMENT POLICY--IRAN
2. IRAN--FOREIGN RELATIONS
Notes:
The West has focused on how to prevent Tehran from acquiring nuclear weapons, or what to do after it does. What we lack is a framework for dealing with Iran before, while and after it crosses the threshold.

Deterrence and a Nuclear-Armed Iran.
Author(s):
1. Duus, Henning P.
Subject(s):
1. NUCLEAR DETERRENCE
2. SHIITES--IRAN
3. NUCLEAR WEAPONS--GOVERNMENT POLICY--IRAN
Notes:
A nuclear deterrence policy will probably not be effective vis-a-vis a nuclear-armed Iran the way it was effective
vis-a-vis the Soviet Union and China because of the present Iranian leadership. The West faces an unprecedented asymmetrical threat. While the West will be deterred by a nuclear-armed Iran, Iran may perceive its own nuclear weapons not as a deterrent but as the facilitator of a unique eschatological opportunity towards the God-promised worldwide rule of Imamite Shi'a Islam.

The Dangers of a Nuclear Iran.
(FOREIGN AFFAIRS, vol. 90, no. 1, January - February 2011, p. 66-81.)

Author(s):
1. Edelman, Eric S.
2. Krepinevich, Andrew F.
3. Montgomery, Evan Braden

Subject(s):
1. NUCLEAR WEAPONS--GOVERNMENT POLICY--IRAN
2. USA--FOREIGN RELATIONS--IRAN
3. IRAN--FOREIGN RELATIONS--USA

Notes:
Iran's acquisition of a bomb would upend the Middle East. It is unclear how a nuclear-armed Iran would weigh the costs, benefits, and risks of brinkmanship and escalation and therefore unclear how easily Tehran could be deterred from attacking the United States' interests or partners in the Middle East.

Obama's Engagement Strategy with Iran: Limited Results.
(MEDITERRANEAN QUARTERLY, vol. 22, no. 1, Winter 2011, p. 93-113.)

Author(s):
1. El-Khawas, Mohamed A.

Subject(s):
1. USA--FOREIGN RELATIONS--IRAN
2. IRAN--FOREIGN RELATIONS--USA
3. ECONOMIC SANCTIONS, AMERICAN--IRAN
4. NUCLEAR WEAPONS--GOVERNMENT POLICY--IRAN

Notes:
The author examines Obama's dual-track strategy of engagement - talks and sanctions - to assess its prospects for persuading Iran to abandon its nuclear program. The essay begins with a discussion of Obama's initial steps to bring Tehran to the negotiating table to address the uranium-enrichment problem. Second is an analysis of Obama's shift to advocate more significant sanctions to persuade Iran to implement the tentative agreement it had accepted in October 2009. Third is a focus on US efforts to gain China's support for a new round of sanctions by the United Nations Security Council. Last is an assessment of whether Obama's sanctions will force Iran into negotiations.
Transatlantic Diplomacy in the Iranian Nuclear Issue: Helping to Build Trust?.
(EUROPEAN SECURITY, vol. 20, no. 3, September 2011, p. 405-430.)

Author(s):
1. Erasto, Tytti

Subject(s):
1. NUCLEAR WEAPONS--GOVERNMENT POLICY--IRAN
2. USA--FOREIGN RELATIONS--IRAN
3. IRAN--FOREIGN RELATIONS--USA
4. EU--IRAN

Notes:
Three European Union (EU) member states - the UK, France and Germany - have played a central role in the Iranian nuclear issue since 2003. However, their contribution cannot be understood without consideration of America's hard-line approach regarding its recent non-proliferation policies in the Middle East and its past policies toward the Islamic Republic. The author argues that these policies have highlighted Iran's military and energy insecurity, and that they cast doubt on the limited nature of the demands made to Iran by the Security Council. The fact that European positions have in recent years moved closer to the US also with respect to the key issues that contribute to Iran's lack of trust can actually be seen to undermine the goals of non-proliferation diplomacy.

The Case Against the Case Against Iran: Regionalism as the West's Last Frontier.
(MIDDLE EAST JOURNAL, vol. 64, no. 3, Summer 2010, p. 341-363.)

Author(s):
1. Shenna, John C.

Subject(s):
1. NUCLEAR WEAPONS--GOVERNMENT POLICY--IRAN
2. IRAN--FOREIGN RELATIONS

Notes:
Iran's leaders have reasons for spurning Western offers of engagement over Iran's nuclear program. They cannot so easily spurn approaches from Turkey and Arab neighbors. Regional engagement should therefore be encouraged, especially by Russia and China, to build confidence in Iran's intention to respect its core Nuclear Non-Proliferation Treaty (NPT) obligation and reduce anxieties that could prompt a regional nuclear arms race. Furthermore, a more rigorous threat analysis suggests Israel can afford to be restrained.

2. USA--FOREIGN RELATIONS--IRAN
3. IRAN--FOREIGN RELATIONS--USA
Notes:
The United States, Israel, and several European allies have explicitly stated that they will not accept the possession of nuclear weapons by the Islamic fundamentalist regime ruling Iran. Iran has defied several UN Security Council resolutions and continued its uranium enrichment. On December 3, 2007, the US released the November 2007 National Intelligence Estimate (NIE) on Iran. If the NIE assessment that Iran could develop nuclear weapons sometimes between 2010 and 2015 is correct, the new American president has twelve options available in dealing with Iran. This study analyzes potential consequences, shortcomings, costs, and benefits of each option.

Iran: Diplomacy and Deterrence.
(SURVIVAL, vol. 51, no. 5, October - November 2009, p. 5-13.)
Author(s):
1. Parasiliti, Andrew
Subject(s):
1. NUCLEAR WEAPONS--IRAN
2. USA--FOREIGN RELATIONS--IRAN
3. IRAN--FOREIGN RELATIONS--USA
Notes:
The Obama administration is not ready to concede an Iranian nuclear weapon. But absent diplomatic progress, the United States may have to accept Iran as a threshold of 'virtual' nuclear power. Neither sanctions nor deterrence is likely to prevent Iran from developing a nuclear-weapons capability, although deterrence might prevent the country from detonating a nuclear device or formally declaring its nuclear status. Washington has so far not threatened the use of force in Iran and is wary of the potentially negative consequences for US interests and allies of a military option that is not even certain to eliminate Iran's nuclear-weapons capability. A
diplomatic breakthrough, however slim the perceived possibilities, is still the best option to halt Iran's nuclear-weapons ambitions.

Deterrence in the Israeli-Iranian Strategic Standoff.
(PARAMETERS, vol. 39, no. 1, Spring 2009, p. 81-94.)
Author(s):
  1. Terrill, W. Andrew
Subject(s):
  1. NUCLEAR WEAPONS--IRAN
  2. ISRAEL--FOREIGN RELATIONS--IRAN
  3. IRAN--FOREIGN RELATIONS--ISRAEL
Notes:
The author addresses the future of the Israeli-Iranian relationship given the assumption that the latter will continue its nuclear adventurism. He presents the possibility that Israel, as a potential Iranian strategic adversary, will be able to successfully establish a system of deterrence based on its current and programmed missile defense technology, supported by its extensive civil defense initiatives. The author then turns his attention to the history of the relationship between the two belligerents, an analysis that leads to the conclusion that much of the current posturing regarding Iranian nuclear capability is in fact an attempt to deter the United States from any thoughts of regime change in Tehran. The author suggests that the new US Administration's reputation for seeking diplomatic solutions to strategic challenges may be the catalyst required to resolve this nuclear dilemma.

Nucleaire iranien : sortir de l'impasse.
Author(s): 1. Gergorin, Jean-Louis
Subject(s): 1. NUCLEAR WEAPONS--GOVERNMENT POLICY--IRAN
Notes: La Republique islamique iranienne se dotera-t-elle d'un armement nucléaire ? C'est une question cruciale pour Israel et pour l'avenir du traité sur la non-proliferation des armes nucléaires, et donc pour le monde entier. Il est encore difficile de répondre à cette question car les protagonistes, l'Iran d'un côté, Israel, l'Ouest de l'autre, se menacent ou tentent de composer pour trouver une issue pacifique. L'auteur dissipe ici les illusions qui empecheraient de parvenir à un accord diplomatique qui nous sortirait de l'impasse.

Author(s):
1. Bowman, Bradley L.
Subject(s):
1. NUCLEAR WEAPONS--IRAN
Notes:
This article examines the historical record of 'nuclear rollback' and the motivations for Iran's apparent pursuit of a nuclear weapons capability in order to identify the broad principles that should guide U.S. and international efforts to resolve the nuclear crisis with Iran. The author argues that Iran, like all states, seeks security and respect. For many Iranians, the past three decades provide proof that such security and respect can only be attained with a strategic nuclear deterrent. In 2009, if the United States can show Tehran a genuine path to security and prestige that does not require nuclear weapons, Tehran might give it serious consideration. However, if the United States and the international community fail to address Iran's legitimate need for security or its desire for international respect, the author believes it may only be a matter of time until Iran obtains a nuclear weapons capability.

3. NUCLEAR WEAPONS--IRAN
Notes:
The prospect of a pre-emptive American strike on Iran in the coming months has receded with the release of the latest United States National Intelligence Estimate. Yet the potential for Washington and Tehran to achieve a so-called 'grand bargain' on all the sources of contention between them is also remote. There are too many factors and players working against such a deal and both sides still aspire to a victory they define as the capitulation of the other.

2. IRAN--FOREIGN RELATIONS--RUSSIA (FEDERATION)
3. NUCLEAR WEAPONS--IRAN

Notes:
Russia and Iran share a common hostility toward the United States. There have, however, been important differences between Moscow and Tehran—especially over nuclear issues. Relations seemed to improve, though, with Vladimir Putin's October 2007 visit to Tehran and Russia's shipment to Iran of the enriched uranium needed to start up the Bushehr nuclear power plant. Important differences, however, remain between the two countries that serve to limit the extent to which they can cooperate.

Iran declares to aim at developing nuclear energy and mastering the whole cycle of nuclear combustion. After the withdrawal of Western experts, Russia took over the building of nuclear plants, without clearly explaining what it really intended to do. Nowadays Iran has no international assistance, either to complete the nuclear plants, or to achieve full control of the nuclear combustion cycle. Going forward seems difficult, even though Iran has proved capable to mobilize a good deal of energy to attain its target.

Subject(s):
1. NUCLEAR WEAPONS--IRAN
2. TURKEY--FOREIGN RELATIONS--IRAN
3. IRAN--FOREIGN RELATIONS--TURKEY

Notes:
Strategic culture is an amalgam of a country's set of shared beliefs, assumptions, and narratives that shape its strategic decision-making process. This article evaluates Iran's evident pursuit of nuclear weapons in light of four key elements of its strategic culture as an attempt to ascertain Iran's goals for developing these weapons. These four elements include: (1) an all-encompassing conviction in Shia Islam as the bedrock of the regime's political legitimacy and the country's national identity; (2) a hypernationalistic belief in Iran's rightful place as the leader of the Islamic civilization and as a regional hegemon; (3) a pervasive sense of external and internal vulnerability; and (4) an ingrained perception that the U.S. desires to dominate and eventually destroy the Islamic civilization. The evaluation of these elements strongly augurs that a nuclear-armed Iran is not likely to employ these weapons offensively due to its fear of retaliation and the constraining interests within its regime's political structure. Rather, its drive toward a nuclear-weapons capability is to provide Iran with a defensive deterrent that will advance its desires for regional hegemony and mitigate its pervasive sense of insecurity.
Living with Ambiguity: Nuclear Deals with Iran and North Korea.
(SURVIVAL, vol. 50, no. 1, February - March 2008, p. 91-118.)

Author(s):
1. Litwak, Robert S.

Subject(s):
1. NUCLEAR WEAPONS--IRAN
2. NUCLEAR WEAPONS--KOREA (NORTH)
3. USA--FOREIGN RELATIONS--IRAN
4. USA--FOREIGN RELATIONS--KOREA (NORTH)
5. IRAN--FOREIGN RELATIONS--USA
6. KOREA (NORTH)--FOREIGN RELATIONS--USA

Notes:
Between the poles of nuclear-weapons acquisition and transparent disarmament lies a third option: cultivating ambiguity about capabilities. The current crises with Iran and North Korea are playing out against the backdrop of the contrasting non-proliferation precedents set in 2003 - in Iraq, through a change of regime, and, in Libya, through change or behaviour change. Coercive diplomacy, combining credible inducements and penalties to roll back their nuclear programmes, is not possible when the goal is the maximalist one of regime change. But even if the United States clarifies its objective, negotiations with North Korea and Iran can realistically aim only to narrow, but not to eliminate, the ambiguity. A strategy of containment, whose key elements are deterrence and reassurance, offers the best approach for narrowing and hedging against these states' nuclear ambiguity.

Economische sancties tegen Iran: successen en tegenvallers.
(INTERNATIONALE SPECTATOR, jg. 62, nr. 9, september 2008, p. 451-453.)

Author(s):
1. Meer, Sico van der

Subject(s):
1. ECONOMIC SANCTIONS--IRAN
2. NUCLEAR WEAPONS--IRAN

Notes:
The author analyzes the economic sanctions against Iran. Although it is not clear whether Iran is secretly developing nuclear weapons, there is a lack of transparency about its nuclear programme. The UN Security Council has imposed economic sanctions on Iran to force the required openness, as well as postponement of the uranium enrichment process. Due to a lack of international consistency in enforcing these UN sanctions, they are not very effective, although they have significant psychological value. Next to the UN sanctions, the United States unilaterally imposed sanctions on international financial institutions that are not negligent in controlling transactions with Iran. Such sanctions are more effective, because money transactions became more difficult. Iran, however, has been capable to reduce economic pressure so far, by replacing economic transactions with the West by transactions with countries like China, Russia and the United Arab Emirates. Nevertheless, the sanctions have an impact on the economic elite of Iran, which in turn may influence the
nuclear policy of the government.

1. NUCLEAR WEAPONS--IRAN
2. IRAN--FOREIGN RELATIONS
Notes:
La République islamique d'Iran estime le contexte régional et international favorable à sa stratégie de 'dissuasion asymétrique' à l'abri de laquelle se poursuit son programme nucléaire. Pour les dirigeants iraniens, les 'déclarations de guerre' lancées par les puissances occidentales font partie d'une 'guerre psychologique', ces puissances étant 'dissuadées' de mener une quelconque opération préventive pour arrêter ou retarder le programme nucléaire iranien. En effet, Washington, Tel-Aviv et Paris, et avec eux la communauté internationale, sont exposées à la machine de guerre et de terreur iranienne. La 'dissuasion' fonctionnera-t-elle pour autant, si l'Iran maintenait ses ambitions nucléaires ? La communauté internationale ne manquera pas de poser le problème actuel sous forme d'une opération de 'pertes et profits', avant que l'Iran n'accède réellement à l'arme atomique et ne fasse jouer pleinement la dissuasion nucléaire.

Author(s):
1. Brookes, Andrew
Subject(s):
1. NUCLEAR WEAPONS--IRAN
2. BOMBING, AERIAL--IRAN
Notes:
The Iranian nuclear site at Natanz is already one of the most protected places on earth, and the apparently never-ending diplomatic minuet over Iran's nuclear activities may be no more than Tehran stringing out negotiations until its nuclear protection programme is complete. Israel lacks the long-range aircraft unilaterally to neutralise a dispersed Iranian nuclear capability, whereas a large coordinated United States air campaign is eminently feasible. Like the invasion of Iraq, the military outcome of such an attack on Iran is a foregone conclusion. Unfortunately, the political, economic and terrorist impact is just as predictable.

Iran : un rapport explosif.
(POLITIQUE INTERNATIONALE, no. 118, hiver 2007 - 2008, p. 143-151.)
Author(s):
  1. Delpech, Therese
Subject(s):
  1. NUCLEAR WEAPONS--IRAN
Notes:
  In November 2007, the National Intelligence Council, grouping the
16 main intelligence organizations in the United States,
published its bombshell report on Iran. Contradicting their
opinion of 2005, these experts now state, with a 'high degree
of certainty', that Tehran had actually halted their program to
develop an atomic bomb. The timing of this announcement gave
rise to all sorts of theories : in addition to one supposing
certain departments taking revenge for being ill-treated since
Iraq, other theories involved political maneuvering in the
run-up to the 2008 presidential election, an Iranian
disinformation operation, or simply incompetence. The report
obviously contains facts. But the way they are being presented
is not so innocent. The danger is that by eliminating a
credible military threat, one also eliminates any possibility
of effective sanctions.

The desire for regime change in Iran has coloured the Bush administration's approach to the challenge presented by Tehran's apparent desire to build a nuclear weapons capability. Yet the threat of military force either to destroy Iran's nuclear infrastructure and/or to effect regime change has proved counterproductive to the simultaneous efforts to stop the Iranian programme through diplomacy. Indeed, the entire Bush policy towards Iran of simultaneously wishing to coerce, undermine and replace the regime while also seeking to persuade it to abandon its nuclear programme through diplomacy has proved both strategically inconsistent and consistently counterproductive. In failing to decide whether it prioritizes a change of regime or a change of behaviour it has got neither. This article elucidates the rationale behind the Bush administration's policy-approach, demonstrating how in seeking both objectives simultaneously it has achieved neither. It sets out instead a set of policies to regain the initiative in US-Iranian relations and to prioritize and coordinate American policy goals within a broader Middle East policy.

Can Iran's Nuclear Capability Be Kept Latent ?.
(SURVIVAL, vol. 49, no. 1, Spring 2007, p. 33-57.)
Author(s):
1. Fitzpatrick, Mark
Subject(s):
1. NUCLEAR WEAPONS--IRAN
Notes:
Iran may not yet have made a decision to produce nuclear weapons and the evidence trail of weapons plans and military involvement stops in 2003. If, as seems likely, UN sanctions and financial pressure do not persuade Tehran to stop its uranium enrichment programme, the United States may turn to military options to try to push back the date by which Iran could have a nuclear weapon. Low confidence that air strikes could delay Iran's weapons programme, however, and the negative consequences that military action would entail should lead policymakers to consider whether the nuclear timeline might be prolonged through negotiation. Accepting the reality of small-scale, intermittent enrichment activity in exchange for tight international inspection access holds some appeal, and the asking price will only rise over time. But legitimising Iran's programme has significant disadvantages, especially without an assurance of swift and severe penalties in the event the deal is broken.

Problématique d'une frappe israélienne sur l'Iran.
(DEFENSE NATIONALE ET SECURITE COLLECTIVE, 63e année, no. 4, avril 2007, p. 122-132.)

Author(s):
1. Giniewski, Paul

Subject(s):
1. ISRAEL--FOREIGN RELATIONS--IRAN
2. IRAN--FOREIGN RELATIONS--ISRAEL
3. NUCLEAR WEAPONS--IRAN

Notes:
La question d'un Iran nucléaire suscite de plus en plus de débats. Face à l'impuissance occidentale, nombreux sont ceux, en Israël, qui appellent à une action préventive contre une genocidie annoncé. Selon les analystes israéliens, faute d'une action militaire, la bombe iranienne ne serait qu'une question de temps. Or, la rhétorique employée par les dirigeants iraniens, et en particulier par le président Ahmadinejad, ne serait pas un slogan, mais bien un programme d'annihilation. La destruction d'Israël serait indispensable pour que s'accomplisse le destin assigné à l'Iran, a savoir l'islamisation du monde. Il émerge donc en Israël un quasi-consensus sur la nécessité de procéder au bombardement des installations nucléaires iraniennes. Reste à en définir le scenario.

The Iranian Nuclear Impasse.

Author(s):
1. Guldimann, Tim

Subject(s):
1. NUCLEAR WEAPONS--IRAN
2. IRAN--FOREIGN RELATIONS--USA
3. USA--FOREIGN RELATIONS--IRAN

Notes:
Tehran has refused to comply with UN Security Council decisions and has accelerated the build-up of its uranium-enrichment programme. Current Iranian nuclear policy probably aims at building a strong bargaining position for an eventual arrangement which would have to pay full respect to the country as a regional power, and to the regime. Such expectations collide with the US policy of further containment and isolation of Iran. There is still a chance for internal correction: Ahmadinejad's brinkmanship can be stopped, but only by the Iranians themselves; external efforts to influence internal politics play into the hands of the radicals. The best way outsiders can support internal reform is to work pragmatically on limited solutions in Iraq and offer more flexibility in the nuclear dispute. For this nuclear dialogue, additional Security Council resolutions should be avoided. New sanctions resolutions will neither resolve the crisis nor add effective value to existing sanctions. The West will just have to live with the fact that Iran will make progress towards the military option; at best this progress can be slowed down. There is no chance of a breakthrough to a real solution of the issue before 2009. If, however, it were possible to calm tensions and avoid further escalation in the short term, under a new American administration and perhaps a new technocratic government in Iran, a window of opportunity for tackling the nuclear issue could open.

1. Hamel, Tewfik

Subject(s):
1. NUCLEAR WEAPONS--IRAN

Notes:
Qu'en est-il de l'Iran ? Menace ou victime ? Celui-ci, sans précédent d'agression, ne cesse d'inquiéter la communauté internationale par son programme nucléaire tout en affirmant qu'il est menacé par ses voisins et victime de propagande. Pourquoi une industrie nucléaire pour un pays possédant autant de ressources en pétrole et de gaz ? La question se posait déjà au début des années 70, elle se pose encore aujourd'hui.

The Lessons of the EU's Iran Diplomacy.
(INTERNATIONALE POLITIK, vol. 8, no. 3, Fall 2007, p. 78-85.)

Author(s):
1. Harnisch, Sebastian

Subject(s):
1. EU--IRAN
2. NUCLEAR WEAPONS--IRAN

Notes:
The European Union's Iran strategy reveals that the Europeans have been learning fast about leadership in crisis management and coercive diplomacy. But in order to convince Iran to stop the most problematic aspects of their nuclear program - uranium enrichment and plutonium production - Europe and the United States must act in unison.

Responding to a Nuclear Iran.

Author(s):
1. Hemmer, Christopher

Subject(s):
1. USA--FOREIGN RELATIONS--IRAN
2. IRAN--FOREIGN RELATIONS--USA
3. NUCLEAR WEAPONS--IRAN

Notes:
The choices America would face if Iran developed nuclear weapons are not simply between preventive military action and doing nothing. The calculations America would face are not between the costs of action versus the costs of inaction. A nuclear-armed Iran will certainly pose a number of challenges for the United States. Those challenges, however, can be met through an active policy of deterrence, containment, engagement, and the reassurance of America's allies in the region.
Iran: The Other Arms Race.
(RUSI JOURNAL, vol. 152, no. 1, February 2007, p. 58-60.)
Author(s):
1. Howard, Roger
Subject(s):
1. NUCLEAR WEAPONS--IRAN
2. ARMS RACE--MIDDLE EAST
Notes:
While the acquisition of a nuclear bomb by Iran would, of course, have enormous strategic ramifications throughout the region and beyond, it is far from certain that it would provoke a nuclear arms race with any country. Much more likely, instead, is an arms race to acquire a clear edge in the means to wage conventional war.

A Nuclear Iran: The Reaction of Neighbours.
(SURVIVAL, vol. 49, no. 2, Summer 2007, p. 111-128.)
Author(s):
1. Kaye, Dalia Dassa
2. Wehrey, Frederic M.
Subject(s):
1. NUCLEAR WEAPONS--IRAN
2. IRAN--FOREIGN RELATIONS
Notes:
Regional reactions to a nuclear-armed Iran will vary, ranging from accommodation and detente to outright hostility and efforts to acquire a countervailing deterrent. Many states do not perceive a nuclear-armed Iran itself to be the principal threat, but are more concerned with secondary or spillover effects, such as a preemptive strike by the United States or Israel, a regional arms race, a nuclear accident or an emboldened Iran that increases its support for terrorism. Given these various threat perceptions, the West should construct a new cooperative security structure that strikes a balance between providing deterrence for allies and creating openings for positive engagement with Iran.
The Iranian Nuclear Threat and the Israeli Options.
(CONTEMPORARY SECURITY POLICY, vol. 28, no. 3, December 2007, p. 513-541.)
Author(s):
1. Pedatzur, Reuven
Subject(s):
1. NUCLEAR WEAPONS--IRAN
2. ISRAEL--FOREIGN RELATIONS--IRAN
3. IRAN--FOREIGN RELATIONS--ISRAEL
4. NUCLEAR DETERRENCE--ISRAEL
Notes:
As a result of developments including the overthrow of Saddam Hussein, Muammar Al-Qaddafi's decision to cease WMD programs, and the weakening of the Syrian military, only one potential strategic threat against Israel remains: the Iranian nuclear program. Iran's acquisition of nuclear weapons is likely to transform the Middle East's strategic balance, force changes in Israel's national security planning in general and its nuclear policy in particular. This article analyses the options open to Israel in response to a nuclear Iran, and the advantages and disadvantages of each. Evaluation of the options available to Israel reveals seven alternatives. In the near future, Israeli decision makers will have to decide whether to adopt one or a mix of options ranging from preemptive attack to un Concealed nuclear deterrence. After analysing each of these options, the conclusion is that Israel probably will move to un Concealed nuclear deterrence in the event of Iran completing the development and the acquisition of nuclear weapons.

The European Union and Iran: What Next?

(INTERNATIONAL SPECTATOR, vol. 42, no. 4, December 2007, p. 537-543.)

Author(s):
1. Posch, Walter

Subject(s):
1. EU--IRAN
2. NUCLEAR WEAPONS--IRAN
3. ECONOMIC SANCTIONS--IRAN

Notes:
EU-Iranian relations have reached a stalemate. EU engagement with Iran makes sense as long as it is accompanied by stringent sanctions that are imposed by the international community (i.e. E3 + 3 format and UNSC) and that focus on the nuclear file only. In the end, such an approach could allow the EU to find that delicate balance between the US position of imposing sanctions for the sake of sanctioning, thereby rendering them ineffective, and a Russian-Chinese position of applying minimal sanctions that would make them equally inefficient.

Osirak Redux? Assessing Israeli Capabilities to Destroy Iranian Nuclear Facilities.

(INTERNATIONAL SECURITY, vol. 31, no. 4, Spring 2007, p. 7-33.)

Author(s):
1. Raas, Whitney
2. Long, Austin

Subject(s):
1. NUCLEAR WEAPONS--IRAN
2. ISRAEL--FOREIGN RELATIONS--IRAN
3. IRAN--FOREIGN RELATIONS--ISRAEL
4. ISRAEL--AIR FORCE
5. BOMBING, AERIAL--IRAN
6. COUNTERPROLIFERATION--ISRAEL

Notes:
Does Israel have the ability to conduct a military attack against Iran's nuclear facilities similar to its 1981 strike on Iraq's Osirak reactor? The Israeli Air Force has significantly upgraded its equipment since the early 1980s, but the Iranian nuclear complex is a much harder target than was the Osirak reactor. Iran has three facilities that are critical for nuclear weapons production: a uranium conversion facility, an enrichment facility, and a heavy-water production plant and associated plutonium production reactor. This article analyzes possible interactions of Israel's improved air force, including the addition of F-15I aircraft and U.S.-supplied conventional 'bunker-buster' precision-guided munitions, with the Iranian target set and air defense systems. It concludes that Israel has the capability to attack Iran's nuclear infrastructure with at least as much confidence as it had in the 1981 Osirak strike. Beyond the case of Iran, this finding has implications for the use of precision-guided weapons as a counterproliferation tool. Precision-guided weapons confer the ability to reliably attack hard and deeply buried targets with conventional, rather than nuclear, weapons. Intelligence on the location of nuclear sites is thus the primary limiting factor of military counterproliferation.

How Will Iran Retaliate to an Attack on its Nuclear Facilities?.
(CONTEMPORARY SECURITY POLICY, vol. 28, no. 3, December 2007, p. 542-558.)

Author(s):
1. Shoham, Dany

Subject(s):
1. NUCLEAR WEAPONS--IRAN
2. WEAPONS OF MASS DESTRUCTION--IRAN

Notes:
The issue of a military strike on Iranian nuclear facilities to halt progress towards nuclear weapons is intensifying. This paper attempts to comprehend that possibility, along with its implications. It does not deal with the prospects for a military strike against Iran. But, since such an attack may take place, the present analysis inquires into the feasibility of non-nuclear, WMD-based Iranian retaliatory options, strategically and operationally, in case the attacker does not intend to eliminate those options, in conjunction with targeting nuclear facilities. Beyond the scope of this paper are the various ways to counter Iranian CBR weapons. This analysis supposes the absence of Iranian nuclear weapons at present. It is concluded that Iran endeavors to sustain rapid retaliatory capabilities by non-nuclear WMD in case its nuclear facilities are attacked. Iranian leaders also have the ability to choose to retaliate at once. A preemptive attack cannot focus exclusively on Iran's nuclear establishment. To be effective, it also must incapacitate Iranian CBR weapons, immediately before or in conjunction with the destruction of nuclear facilities.

Iran en de bom: bewijs, motieven en aanpak.

INTERNATIONALE SPECTATOR, jg. 60, nr. 1, januari 2006, p. 3-7.

Author(s):
1. Boekestijn, Arend Jan

Subject(s):
1. NUCLEAR WEAPONS--IRAN

Notes:
The author surveys Iran's nuclear ambitions and potentialities. Although no smoking gun has yet been found there is considerable circumstantial evidence that Iran is in the process of developing a nuclear bomb. Iran's claim that it seeks only the efficient generation of electricity by nuclear power cannot explain its desire to acquire the capability to enrich and reprocess uranium which is after all only vital to a nuclear weapons programme. There are at least two good reasons why the West should try to prevent Iran from acquiring a nuclear bomb. If Iran will have a bomb it will be much more difficult for the West to contain its support of terrorist activities. Secondly, if Iran will have a bomb other countries like Saudi Arabia, Egypt and Turkey may follow suit. The Western world can try to prevent Iran from going nuclear with a grand bargain, carrots and sticks, containment and surgical strikes. Unfortunately, none of these options may work - with adverse consequences for the war on terrorism.

L'usage pacifique du nucléaire et la non-proliferation.

POLITIQUE ETRANGERE, 71e année, no. 3, 2006, p. 609-621.

Author(s):
1. Boutherin, Gregory
2. Kiffer, Daniel

Subject(s):
1. NUCLEAR NONPROLIFERATION
2. NUCLEAR ENERGY
3. NUCLEAR WEAPONS--IRAN
4. NUCLEAR NONPROLIFERATION--IRAN

Notes:
La crise actuelle avec l'Iran met en lumière la difficulté de concilier le droit à l'usage pacifique des technologies nucléaires et la non-proliferation. Si l'Iran respecte la lettre du TNP, il n'en respecte pas l'esprit, ayant mené des activités non déclarées préalablement à l'AIEA, et n'ayant pas respecté ses propres engagements d'application du protocole additionnel aux garanties de l'Agence. On se retrouve donc face à un problème d'interprétation des dispositions du TNP.
Air Attack Iran.
(RUSI JOURNAL, vol. 151, no. 3, June 2006, p. 52-55.)
Author(s):
1. Brookes, Andrew
Subject(s):
1. NUCLEAR WEAPONS--IRAN
2. USA--FOREIGN RELATIONS--IRAN
3. IRAN--FOREIGN RELATIONS--USA
Notes:
There is much sabre-rattling over Iran's nuclear activities. Tehran is some years away from producing a nuclear weapon, but within months it may be able to master the techniques for operating a cascade of centrifuges. Thereafter it could install cascades at clandestine facilities and produce fissile material for a nuclear weapon. The international community wants to prevent Iran from mastering this technology. But what if diplomacy fails? This article examines how an air campaign against Iranian nuclear sites would fare.

The Clock's Ticking : Stopping Iran Before It's Too Late.
(ARMS CONTROL TODAY, vol. 36, no. 9, November 2006, p. 17-21.)
Author(s):
1. Cirincione, Joseph
Subject(s):
1. NUCLEAR WEAPONS--IRAN
Notes:
Time is running out on Iran. Decisions are being made in Washington and Tehran that could put the two countries on a collision course in the new year. The dominant leadership faction in Iran seems determined to continue a steady march to nuclear capabilities that could make Iran a nuclear-weapon state sometime in the next decade. Simply the perception that Iran may get the ability to make a weapon seems to be enough to convince its regional rivals that they should create their own nuclear hedges.

L'Iran et la bombe : options de fin de partie.
(POLITIQUE INTERNATIONALE, no. 111, printemps 2006, p. 177-186.)
Author(s):
1. Delpech, Therese
Subject(s):
1. NUCLEAR WEAPONS--IRAN
Notes:
In certain situations, no choice is the right one. This is more or less the case with Iran and its nuclear program. To properly evaluate the options that remain on the table, one has to take into account the fact that all negotiations since 2003 have failed, not only with the Europeans, but also with the Russians; that successive discoveries by international inspectors have deepened the crisis; that Tehran has openly violated the non-proliferation treaty; and that concerns are mounting in a region that is already very unstable, and where the big question is how to deal with a future nuclear Iran. Faced with this situation, the international community has four main options: inaction; a compromise; a series of ever-harder
sanctions; or military force. The second option has already failed, and the third is not possible given the disagreements within the Security Council. This basically leaves only the first ... which is likely to lead to the last!

Iran 2006 : les limites du pessimisme.
(COMMENTAIRE, vol. 29, no. 115, automne 2006, p. 605-613.)
Author(s):
1. Delpech, Therese
Subject(s):
1. NUCLEAR WEAPONS--IRAN
Notes:
La situation creee par l'eventuelle decision de l'Iran de se doter d'armes nucleaires peut devenir dangereuse pour la paix au Moyen-Orient et pour l'avenir de la proliferation nucleaire.

Coercive Counter-Proliferation and Escalation : Assessing the Iran Military Option.
Author(s):
1. Devine, James
2. Schofield, Julian
Subject(s):
1. USA--FOREIGN RELATIONS--IRAN
2. IRAN--FOREIGN RELATIONS--USA
3. NUCLEAR WEAPONS--IRAN
Notes:
US attacks on Iran to destroy its nuclear facilities would be extremely costly. Although surgical air strikes may succeed in crippling Iran's nuclear program, it would not be as simple as the Israeli strike against Iraq's Orsirak reactor in 1981. Iran is also likely to retaliate, which may force the US to expand its goals to include regime change, a task for which the available regular and Army National Guard forces are presently inadequate.

Proliferation nucleaire : quelles limites a la marche forcee de l'Iran ?.
(DEFENSE NATIONALE ET SECURITE COLLECTIVE, 62e annee, no. 5, mai 2006, p. 86-97.)
Author(s):
1. Drouhaud, Pascal
Subject(s):
1. NUCLEAR WEAPONS--IRAN
Notes:
Depuis le 9 mars 2006, le Conseil de securite de l'ONU est saisi du dossier iranien par l'AIEA qui constatait l'echec des annees de negociations entre l'Iran et les Europens representes au sein de l'UE3 (Allemagne, France, Grande-Bretagne). Apres l'election en juin 2005 de M. Ahmadinejad, les rapports avec la communauta internationale se sont sensiblement tendus avec la
reprise des activités nucleaires (retraitement, enrichissement, etc.). Les Occidentaux sont désormais persuades que ce programme civil permet à l'Iran de cacher un programme militaire qui, s'il devait aboutir, bouleverserait les rapports dans une région stratégique autant sur le plan politique qu'économique. Les tensions générées par la politique iranienne dans sa marche forcee vers le nucléaire placent au premier plan le problème de la prolifération nucléaire qui tend à devenir l'un des risques majeurs du XXIe siècle.

Making the Right Call : Limiting Iran's Nuclear Program.
(ARMS CONTROL TODAY, vol. 36, no. 2, March 2006, p. 6-12.)

Author(s):
1. Ferguson, Charles D.
2. Takeyh, Ray

Subject(s):
1. NUCLEAR WEAPONS--IRAN

Notes:
After the International Atomic Energy Agency (IAEA) on Feb. 4 voted to report Iran to the UN Security Council because of concerns over its nuclear program, the rituals of diplomacy persist. The international community sees the Security Council move as ratcheting up pressure in order to deter Iran from moving closer to potential weapons capability. Yet, the Islamic Republic of Iran is seemingly determined to acquire a sophisticated nuclear infrastructure that will avail it a weapons option at some point in the near future.

Iran and North Korea : The Proliferation Nexus.
(SURVIVAL, vol. 48, no. 1, Spring 2006, p. 61-80.)

Author(s):
1. Fitzpatrick, Mark

Subject(s):
1. NUCLEAR WEAPONS--IRAN
2. NUCLEAR WEAPONS--KOREA (NORTH)

Notes:
As international pressure mounts against the nuclear and missile proliferation threats posed by North Korea and Iran, the two nations are increasingly likely to turn to one another. While nuclear cooperation is a matter of unconfirmed speculation, North Korea-Iran missile cooperation is well documented. To what extent the two pariahs coordinate strategy is unclear; certainly they keep an attentive eye toward each other. The United States, meanwhile, appears not to coordinate its own policies toward the two states. Washington engages with Pyongyang and has offered it security assurances, policies that remain off limits for Tehran.
Assessing Iran's Nuclear Programme.
(SURVIVAL, vol. 48, no. 3, Autumn 2006, p. 5-26.)
Author(s):
1. Fitzpatrick, Mark
Subject(s):
1. NUCLEAR WEAPONS--IRAN
Notes:
The many indicators of military involvement in Iran's nuclear programme strongly suggest that Iran seeks more than just a latent nuclear-weapons capability, although not necessarily an all-out Manhattan Project-style effort. Depending on assumptions about technical variables, the earliest Iran might be able to produce enough highly enriched uranium for a nuclear weapon is assessed to fall between the end of 2008 and 2010, a range that might be said to be within the margin of error, given the unknowns about the programme and the inspectors' sharply decreased access. This timetable provides room for diplomacy. There are strong arguments, with universal appeal, for opposing an Iranian nuclear-weapons capability.

Iran and Sanctions : Ready to Resist.
(WORLD TODAY, vol. 62, no. 2, February 2006, p. 8-9.)
Author(s):
1. Howard, Roger
Subject(s):
1. ECONOMIC SANCTIONS--IRAN
2. NUCLEAR WEAPONS--IRAN
Notes:
Although Iran claims to be pursuing only a peaceful programme of civilian energy, its decision to resume the enrichment of uranium has provoked a storm of fierce international protest and elicited strong calls for its immediate referral to the United Nations Security Council. After more than two years of negotiations, the diplomatic push to solve the nuclear issue has been widely pronounced dead. Hopes have instead been pinned on UN-imposed sanctions to force Tehran's compliance with its obligation, as a signatory of the 1968 Non-Proliferation Treaty, to prevent 'the diversion of nuclear energy from peaceful uses to nuclear weapons'.

Sanctions at the Ready.
(WORLD TODAY, vol. 62, no. 7, July 2006, p. 7-9.)
Author(s):
1. Howard, Roger
Subject(s):
1. ECONOMIC SANCTIONS--IRAN
2. NUCLEAR WEAPONS--IRAN
Notes:
The offer by the United States and the European Union to negotiate with Iran - the first such talks between Washington and Tehran for 25 years - carries with it incentives for acceptance and potential penalties for rejection. When considering its response, the Islamic Republic will bear in mind not only targeted sanctions that are apparently part of the package widely agreed internationally - including by China and Russia -
but also secondary sanctions that have already encouraged companies trading with both Iran and America to withdraw. But such sanctions have a political and economic price for the US too, and this was no doubt part of the calculation that it was time to talk about nuclear issues.

Dr Folamour a Teheran ou pourquoi faut-il a nouveau s'inquieter a propos de la bombe ?.
(REVUE INTERNATIONALE ET STRATEGIQUE, no. 64, hiver 2006 - 2007, p. 29-37.)
Author(s):
1. Hummel, Alexandre
Subject(s):
1. NUCLEAR WEAPONS--IRAN
Notes:
Cet article remet en cause un postulat largement partage par les partisans et une partie des adversaires d'une nuclearisation de l'Iran, le nucleaire stabilisateur. Il s'agit de presenter une vision 'pessimiste', selon laquelle un Iran nuclearise est source d'instabilite strategique en raison du risque d'accident, de problemes de controle et des incitations de frappe en premier. Cette instabilite est encore accrue en temps de crise, notamment dans la mesure ou la Republique islamique peut la mettre a profit pour pratiquer une forme particuliere de dissuasion du faible au fort. Le sujet ne saurait donc etre traite a la legere et il faut proceder a une etude approfondie des motivations de Teheran. Le cadre conceptuel est cependant encore defaillant sur ce point.

Rebels Without a Cause : North Korea, Iran and the NPT.
(INTERNATIONAL AFFAIRS, vol. 82, no. 4, July 2006, p. 723-742.)
Author(s):
1. Huntley, Wade L.
Subject(s):
1. NUCLEAR NONPROLIFERATION
2. NUCLEAR WEAPONS--KOREA (NORTH)
3. NUCLEAR WEAPONS--IRAN
Notes:
Unchecked nuclear weapons development in North Korea and the incipient nuclear weapons programme in Iran currently pose seminal challenges to the Nuclear Nonproliferation Treaty (NPT). The disposition of these cases may determine the future of the NPT and will shape non-proliferation and disarmament efforts for the next decade or more. This article assesses these two challenges, focusing on the actions concerned European states might take to leverage and guide the inevitably central US role. The article concludes that, by smoothing the sharper edges of US nuclear and strategic policies, European states can promote political conditions more favourable to non-proliferation solutions in both critical cases and help reduce reliance on nuclear weapons threats in global security relations more broadly.

  1. Katz, Mark N.
Subject(s):
  1. RUSSIA (FEDERATION)--FOREIGN RELATIONS--IRAN
  2. IRAN--FOREIGN RELATIONS--RUSSIA (FEDERATION)
  3. NUCLEAR WEAPONS--IRAN
Notes:
This article examines Russian policies toward and views of Iran since President Ahmadinejad's election in June 2005 with regard to the most prominent issue in the Russian-Iranian relationship: the Iranian nuclear crisis. What this analysis shows is that Moscow has become increasingly frustrated with Ahmadinejad. Despite this, however, Moscow is unlikely to support a confrontational American approach to the Iranian nuclear issue, not only out of a desire to prevent the United States from becoming even more dominant but also out of fear of losing what stakes Russia now has (and hopes to have) in Iran.

Good for the Shah, Banned for the Mullahs: The West and Iran's Quest for Nuclear Power.
(MIDDLE EAST JOURNAL, vol. 60, no. 2, Spring 2006, p. 207-232.)
Author(s):
  1. Kibaroglu, Mustafa
Subject(s):
  1. NUCLEAR WEAPONS--IRAN
Notes:
Iran's nuclear program has become a highly controversial issue in international politics since the August 2002 unveiling of the secretly built uranium enrichment facility in Natanz and the heavy-water production plant in Arak. American officials and experts assert that Iran has secret plans to use its nuclear capabilities to develop nuclear weapons. Iranian officials, however, deny such allegations and claim that they will use their capabilities exclusively for peaceful purposes. Notwithstanding the official rhetoric, some Iranian scholars, intellectuals, and even bureaucrats argue that Iran should seriously consider developing nuclear weapons given that they have the necessary skills and capabilities as well as the reasons to do so. The clerical leaders have supposedly not yet decided about weaponizing Iran's nuclear capability. However, the ever-increasing size of Iran's existing nuclear infrastructure, and the achievements of Iranian scientists, who claim to have developed indigenous capabilities, may very well elevate Iran to the status of a nuclear power, even a de facto nuclear-weapons state.

L'Iran et la bombe : un faux probleme ?.
(POLITIQUE INTERNATIONALE, no. 111, printemps 2006, p. 187-198.)
Author(s):
1. Moreau Defarges, Philippe
Subject(s):
1. NUCLEAR WEAPONS--IRAN
Notes:
The whole world trembles : Iran is on the point of possessing nuclear arms. Willing to go to any length to obtain this tool of any self-respecting 'major power', Tehran has been moving ever forward in its goal of mastering the uranium enrichment processes to develop atomic energy for military purposes. Divided and indecisive, the international community has not found a way to avoid this outcome. But do we really need to panic ? Probably not. The pragmatism of the Islamic Republic should not be underestimated. In reality, Iran only wishes to establish its authority in the Middle East and strengthen its international prestige. Furthermore, Iran's joining the nuclear club only hastens the ineluctable demise of the non-proliferation treaty. A new 'democratic' nuclear order (in which nuclear weapons are not just the preserve of the few) should see the light of day.
ID Number: JA022399
Year: 2006
Language: French
Type: ART
Tension between the United States and Iran seems to be at a peak. For the Bush administration, the land of the mullahs is part of the 'axis of evil'. The White House wants to restrict Tehran's regional influence at any price, and is even considering the use of force to stop the country developing nuclear weapons. In the eye's of Ahmadinejad's government, America is the 'Great Satan'. The Shiite giant wants to get the bomb, at any price, and claims to be leading a global revolt against Washington's hegemony. Given this explosive context, pessimists, are already forecasting an armed conflict. And yet, the two countries are condemned to reach an understanding. Plunged into chaos (with the Arab world in upheaval to the west, an itchy Russia to the north and an Afghanistan torn asunder to the east), it's in Iran's interest to make overtures to its enemy. For the United States, it's a question of pragmatism : didn't the Baker-Hamilton commission recommend a dialog with Tehran ? Perhaps reason will win out in the end ...

Tehran's stern nuclear policy is not a result of the advent of Ahmadinejad as much as a reflection of the failure of Iran's previous president, Mohammad Khatami, to redefine U.S.-Iranian relations by pursuing a more conciliatory policy. Absent a strategic intent from Washington to acknowledge Iranian aspirations in the region, a sustainable compromise on the nuclear issue is unlikely to be achieved even if moderates or conservative pragmatists make a political comeback in Iran.
Bringing Iran to the Bargaining Table.
(CURRENT HISTORY, vol. 105, no. 694, November 2006, p. 365-370.)

Faut-il avoir peur d'Ahmadinejad ?.
(POLITIQUE INTERNATIONALE, no. 111, printemps 2006, p. 199-208.)
Author(s):
1. Roy, Olivier
Subject(s):
1. IRAN--POLITICS AND GOVERNMENT
2. IRAN--FOREIGN RELATIONS
3. NUCLEAR WEAPONS--IRAN
Notes:
In June 2005, Mahmud Ahmadinejad was elected president of Iran, to everyone's surprise. With a populist economic program and an ultraconservative religious approach, the former mayor of Tehran defied forecasts to beat the favorite, the former president Akbar Hashemi-Rafsanjani. Ahmadinejad was brought to power thanks to a subtle alliance with the Revolutionary Guards (the Pasdarans, mostly veterans from the Iraq war, as he is) and a faction of the clergy. In less than a year, he has dramatically changed the face of Iranian politics and has broken with the consensual style of his reforming predecessor, Mohammed Khatami. Above all, he has opted for a radical position on the nuclear question. And yet, in the Islamic Republic, it is in fact the Supreme Guide, Ali Khamenei, who really holds power. And if the maximalist approach of Ahmadinejad eventually seems too dangerous for the regime, the Guide will not hesitate to get rid of him.

Author(s):
1. Sauer, Tom

Subject(s):
1. NUCLEAR WEAPONS--IRAN

Notes:
In dit artikel wordt nagegaan in hoeverre en waarom Iran effectief werkt aan een kernwapenprogramma. Vervolgens wordt aandacht besteed aan de stappen die de internationale gemeenschap heeft genomen om dit geval van proliferatie tegen te gaan. In het bijzonder wordt de verdienstelijke poging van de EU-3 - Duitsland, Frankrijk en het Verenigd Koninkrijk - onder de loep genomen. Ook wordt een voorlopige inschatting gemaakt van mogelijke toekomstscenario's, inclusief de voortgang van het pokerspel op het niveau van de Veiligheidsraad, en het preventief bombarderen van de Iraanse nucleaire installaties in geval de diplomatieke weg mislukt. Tot slot wordt dit geval van verdere verspreiding van kernwapens in een ruimere context geplaatst, waarbij wordt gesteld dat het bestaande non-proliferatieregime op termijn niet houdbaar is. De kloof tussen de kernwapenstaten en niet-kernwapenstaten wordt steeds groter.

Nuclear Proliferation in the Middle East: Iran and Israel.
(CONTEMPORARY SECURITY POLICY, vol. 26, no. 1, April 2005, p. 25-43.)

Author(s):
1. Bahgat, Gawdat

Subject(s):
1. NUCLEAR NONPROLIFERATION--IRAN
2. NUCLEAR NONPROLIFERATION--ISRAEL
3. NUCLEAR WEAPONS--IRAN
4. NUCLEAR WEAPONS--ISRAEL

Notes:
Since the early 2000s the nuclear non-proliferation regime has been seriously challenged, particularly by North Korea and Iran. In the Middle East, following the toppling of Saddam Hussein's regime by an American-led international coalition, the international community's attention has focused on Iran's nuclear programme. The United States claims that Iran is actively seeking to develop nuclear weapons. The European Union, led by the United Kingdom, France and Germany, and the International Atomic Energy Agency agree with their counterparts in Washington that a nuclear Iran would pose a serious challenge to strategic stability in the Middle East and Central Asia. The EU and the IAEA, however, are focused more on carrots (diplomacy and economic incentives) and less on sticks (military force). Iranian officials categorically deny any interest in acquiring nuclear weapons. Iran's nuclear programme should not be addressed in isolation from other regional
dynamics. It cannot be fully understood without reference to the only nuclear power in the Middle East - Israel. This study examines nuclear proliferation in Iran and Israel. It analyses the motivation and the capability of both countries as well as the possibility of a pre-emption Israeli strike on Iran's nuclear installations. The paper argues that the non-proliferation regime needs to be re-examined to accommodate the growing need for nuclear technology without converting it into nuclear weapons.

L'Iran nucleaire : la course contre la montre.  
(POLITIQUE ETRANGERE, 70e annee, no. 3, 2005, p. 575-584.)
Author(s):
  1. Delpech, Therese
Subject(s):
  1. NUCLEAR WEAPONS--IRAN
Notes:
  L'accession a la presidence d'un ultra-conservateur a eloine encore la perspective d'une issue positive de la negociation engagee par les Europeens avec Teheran. On assiste desormais a une veritable course contre la montre ou le temps necessaire pour prendre les decisions qui s'imposent au Conseil des gouverneurs de l'AIEA et au Conseil de securite doit etre inferieur a celui dont les Iraniens ont besoin pour franchir la derniere etape avant l'enrichissement de l'uranium. A la fin aout, l'avantage est a l'Iran.

Iran's Nuclear Controversy : Prospects for a Diplomatic Solution.  
(MEDITERRANEAN QUARTERLY, vol. 16, no. 4, Fall 2005, p. 20-41.)

Taking on Tehran.
(FOREIGN AFFAIRS, vol. 84, no. 2, March - April 2005, p. 20-34.)
Author(s):
  1. Pollack, Kenneth
  2. Takeyh, Ray
Subject(s):
  1. NUCLEAR WEAPONS--IRAN
  2. ECONOMIC SANCTIONS--IRAN
Notes:
If Washington wants to derail Iran's nuclear program, it must take
advantage of a split in Tehran between hard-liners, who care
mostly about security, and pragmatists, who want to fix Iran's
ailing economy. By promising strong rewards for compliance and
severe penalties for defiance, Washington can strengthen the
pragmatists' case that Tehran should choose butter over bombs.
The Impact of Iran's Nuclearization on Israel.  
(MIDDLE EAST POLICY, vol. 12, no. 2, Summer 2005, p. 58-72.)  
Author(s):  
1. Sadr, Ehsaneh I.  
Subject(s):  
1. NUCLEAR WEAPONS--IRAN  
2. ISRAEL--FOREIGN RELATIONS--IRAN  
3. IRAN--FOREIGN RELATIONS--ISRAEL  
Notes:  
Despite Israel's strategically understandable claims regarding its ability to preempt Iranian nuclearization through unilateral military action, many experts foresee complications that make a single-strike success extremely difficult if not impossible. Furthermore, even if Iran's nuclear capabilities were eliminated or significantly impaired in such an attack, the military and political ramifications for Israel and its allies are likely to be much more costly than they were in 1981. Thus, it is necessary to consider whether the costs and opportunities associated with the emergence of a nuclear Iran might not be more tolerable than those associated with military action.

Schurkenstaat Iran : een 'self-fulfilling prophecy' ?.  
(INTERNATIONALE SPECTATOR, jg. 59, nr. 7 - 8, juli - augustus 2005, p. 408-411.)  
Author(s):  
1. Seela, Ute  
2. Boeke, Sergei  
Subject(s):  
1. NUCLEAR WEAPONS--IRAN  
Notes:  
The authors describe Iran's nuclear weapons ambitions as a case of a self fulfilling prophecy. It is precisely the American rhetorics of the Axis of Evil, regime change, rogue states and preemptive attacks that conditions Iran's perceptions of its endangered situation. Therefore, Iran concludes that its only means of deterrence is the acquisition of nuclear weapons.

The Iranian Nuclear Challenge.
INTERNATIONAL AFFAIRS, vol. 80, no. 2, March 2004, p. 257-276.)
Author(s):
  1. Bowen, Wyn Q.
  2. Kidd, Joanna
Subject(s):
  1. NUCLEAR WEAPONS--IRAN
Notes:
In December 2003 Iran signed an Additional Protocol to its Safeguards Agreement with the International Atomic Energy Authority. The signing followed 18 months of mounting international pressure on Iran to prove its benign motives following revelations about past failures to declare work on uranium enrichment and plutonium separation - the two routes to producing nuclear weapons-grade material. Although Iran has strenuously denied having a nuclear weapons programme, both the United States and the European Union have been highly suspicious. However, their responses to Iran have shown a divergence in how to counter the proliferation of weapons of mass destruction. The way forward on Iran will be influenced significantly by the extent to which the American and European approaches can be reconciled or otherwise.
Trois europeens a Teheran.
(POLITIQUE INTERNATIONALE, no. 106, hiver 2004 - 2005, p. 129-143.)
Author(s):
  1. Delpech, Therese
Subject(s):
  1. NUCLEAR WEAPONS--IRAN
Notes:
  Iran wants nuclear weapons. Nobody any longer doubts its intentions. Until recently, however, efforts by the international community to dissuade Teheran from moving ahead in this direction had proved futile. On October 21, 2003, Iran signed an agreement with three European negotiators - France, the United Kingdom and Germany - calling for the suspension of uranium enrichment and reprocessing operations. Unfortunately, the agreement was never really implemented and was openly violated starting in June 2004. This once again exposes the Teheran regime to the threat of seeing the issue brought before the UN Security Council, which means that sanctions could be voted. To avoid using this last resort, the Europeans returned to the negotiating table last November, this time bent on getting the Iranians to immediately abandon their nuclear program. Unfortunately, it is likely that, like the preceding negotiations, this last chance attempt is also destined to fail.

A Transatlantic Strategy on Iran's Nuclear Program.
(WASHINGTON QUARTERLY, vol. 27, no. 4, Autumn 2004, p. 21-32.)
Author(s):
  1. Einhorn, Robert J.
Subject(s):
  1. NUCLEAR WEAPONS--IRAN
Notes:
  Europe and the US need to devise a common strategy and switch roles - for Europe to play bad cop and the US to play good cop - to radically alter Iran's calculations of benefit and risk and get Tehran to choose international cooperation over nuclear weapons.
Meeting the Iranian Nuclear Challenge.
(RUSI JOURNAL, vol. 149, no. 5, October 2004, p. 66-70.)

Author(s):
1. Howard, Roger

Subject(s):
1. NUCLEAR WEAPONS--IRAN

Notes:
This article argues that, while the Western world should certainly fear the development of an Iranian nuclear warhead, the reasons for doing so are not those commonly put forward. And while the imposition of economic sanctions is certainly the most powerful weapon in the Western armoury, there are some other important measures that can also be taken.

Addressing the Iranian Nuclear Option.
(international Spectator, vol. 39, no. 4, October - December 2004, p. 53-63.)

Author(s):
1. Martellini, Maurizio
2. Redaelli, Riccardo

Subject(s):
1. NUCLEAR WEAPONS--IRAN

Notes:
The authors argue that the only way to prevent Iran from developing its nuclear programme further is through concerted engagement directly addressing its security concerns. In fact, Iran's nuclear ambitions must be understood mainly as an attempt to react against security threats coming from its nearest abroad - Iran is surrounded by weak or failed states which host hundreds of thousands of US troops. The authors suggest that the US should abandon its hard approach and support European efforts to reach an agreement with the Iranians. What is needed is a 'grand bargain' with both economic rewards and political inducements able to establish a durable security assurance system in the Gulf region.

Iran in Iraq's Shadow : Dealing with Tehran's Nuclear Weapons Bid.
(PARAMETERS, vol. 34, no. 3, Autumn 2004, p. 31-45.)
Author(s):
1. Russell, Richard L.
Subject(s):
1. NUCLEAR WEAPONS--IRAN
Notes:
This article examines Iran's sojourn into the world of nuclear power and its impact on the Gulf region. It is a candid analysis of Tehran's hegemonic aspirations and the accompanying nuclear programs. The author tells the reader that Iran emerged from its war with Iraq a broken power (militarily). He adroitly points out that in Iran's geopolitical landscape and strategic calculus, America remains the 'demon' threatening its vision of the Middle East region. It is Iran's attempts to overcome its military deficiencies and to counter the perceived threat from America that is driving Tehran's nuclear program. The author predicts that if the United States does not play a more active role, Tehran will certainly, if it hasn't already, succeed in its quest.

Iran Builds the Bomb.
(SURVIVAL, vol. 46, no. 4, November 2004, p. 51-63.)
Author(s):
1. Takeyh, Ray
Subject(s):
1. NUCLEAR WEAPONS--IRAN
Notes:
The Islamic Republic is immersed in an intense debate regarding the direction of its nuclear programme. What Iran will do is likely to depend on the type of relationship it has with the United States, the emerging security architecture in the Persian Gulf and the evolving nature of its domestic politics. As constituencies and alliances shift, and policies and positions alter within the corridors of clerical power, Washington has an opportunity to influence the direction of Iran's nuclear deliberations before decisive steps are taken in the wrong direction. Through a bilateral arrangement involving mutual concessions from both sides, the US could empower those within the clerical estate calling for nuclear restraint. In dealing with Iran's nuclear crisis, US leadership and active engagement are indispensable.
2003

Nuclear Standoff.
(WORLD TODAY, vol. 59, no. 11, November 2003, p. 7-8.)
Author(s):  
1. Ansari, Ali M.
Subject(s):

Non-Proliferation and the Dilemmas of Regime Change.
Author(s):
1. Litwak, Robert S.
Subject(s):
1. WMD NONPROLIFERATION--USA
2. NUCLEAR WEAPONS--KOREA (NORTH)
3. NUCLEAR WEAPONS--IRAN
4. IRAQ WAR, 2003-
Notes:
The Iraq war was unprecedented in at least one respect: it was
the first case in which forcible regime change was the means
employed to achieve non-proliferation ends. In addressing the
current proliferation crises with North Korea and Iran,
however, the Bush administration confronts major constraints on
both the use of force and the US ability to bring about regime
change. This has prompted a shift in strategy to the
alternative combination of deterrence and reassurance.
Implementing a strategy of deterrence and reassurance requires
effective policy coordination to ensure that the two components
are in sync. Military moves for purposes of deterrence should
not undercut the message of political reassurance and thereby
provide further incentive for either country to cross the
nuclear threshold.

Ending Russian Assistance to Iran's Nuclear Bomb.

Author(s):
1. Einhorn, Robert J.
2. Samore, Gary

Subject(s):
1. NUCLEAR WEAPONS--IRAN
2. ARMS TRANSFERS--RUSSIA (FEDERATION)
3. ARMS TRANSFERS--IRAN

Notes:
Both the United States and Russia want to prevent Iran from acquiring nuclear-armed ballistic missiles. Yet the transfer of sensitive Russian assistance to Iran continues, leading many in Washington to conclude that Moscow is tolerating a certain amount of leakage to protect its broader strategic and economic relations with Tehran. The time may be ripe to resolve this protracted and frustrating dispute. Washington should be prepared to relax its objections to Russian nuclear-power sales to Iran if Tehran accepts (and complies with) additional limits and restrictions on its nuclear activities. Tehran's willingness to accept these arrangements will test its true nuclear intentions. US-Russian agreement on an approach to solving this problem would not only make a major contribution to heading off a destabilising Iranian nuclear capability, but could also restore genuine cooperation between the two countries in pursuing their common nonproliferation interests.
