Acquisitions List
January 2020
New Books and Journal Articles

Liste d’acquisitions
Janvier 2020
Nouveaux livres et articles de revues
How to borrow items from the list below:

As a member of the NATO HQ staff you can borrow books (Media: Book) for one month, journals (Media: Article) and reference works (Collection Type: Reference Collection) for one week. Individuals not belonging to NATO staff can borrow books through their local library via the interlibrary loan system.

How to obtain the Multimedia Library publications:

All Library publications are available on the NATO Internet website at http://www.nato.int/library.

Disclaimer:

NATO is not responsible for the content of the publications cited in this Acquisitions List. Furthermore, the views and opinions of the authors expressed in these documents do not necessarily state or reflect those of NATO.

Comment emprunter les documents cités ci-dessous:

En tant que membre du personnel de l’OTAN vous pouvez emprunter les livres (Media : Book) pour un mois, les revues (Media : Article) et les ouvrages de référence (Collection Type : Reference Collection) pour une semaine. Les personnes n’appartenant pas au personnel de l’OTAN peuvent s’adresser à leur bibliothèque locale et emprunter les livres via le système de prêt interbibliothèques.

Comment obtenir les publications de la Bibliothèque multimédia:

Toutes les publications de la Bibliothèque sont disponibles sur le site Internet de l’OTAN, à http://www.nato.int/library.

Clause de non-responsabilité:

Le contenu des publications mentionnées dans cette liste d’acquisitions n’engage pas la responsabilité de l’OTAN. De plus, les points de vue et opinions des auteurs, tels qu’exprimés dans ces documents ne reflètent pas nécessairement ceux de l’OTAN.

Title: China's New Role in African Politics: From Non-Intervention Towards Stabilization?

Additional Author: Hartmann, Christof, ed.
Additional Author: Noesselt, Nele, ed.
Published: Abingdon, UK: Routledge, 2020
Physical Description: x, 244 pages; 24 cm.
Series: Routledge Global Cooperation Series
Notes: Includes index.

Notes: China's rise to global power status in recent decades has been accompanied with a deepening trade relationship with Africa, leading to much academic debate about the influence of Chinese business in the continent. However, China's engagement with African states at the political and diplomatic level has received less attention in the literature. This book investigates the impact of Chinese policies on African politics, asking how China deals with political instability in Africa and in turn how Africans perceive China to be helping or hindering political stability. Whilst China officially operates with a foreign policy strategy which conceives of Africa as one integrated monolithic area (with FOCAC the flagship of inter-continental cooperation), this book highlights the plurality of context-specific interaction patterns between China and African elites, demonstrating how Chinese politics in the context of resource-rich and geostrategically important countries differs from the strategies coined for relations with those African states without strategic resources. By looking comparatively at a range of different country cases, the book aims to develop a theoretical framework that assesses how China reacts to political stability and instability, and in which ways the country contributes to domestic political dynamics and stability within African states.

DEFENSE INDUSTRIES--EU
Title: Defence Industrial Cooperation in the European Union : The State, the Firm and Europe
Author: Fiott, Daniel
Published: Abingdon, UK : Routledge, 2019
Physical Description: xi, 202 pages : illustrations ; 24 cm.
Series: Routledge Studies in European Security and Strategy
Notes: This book provides an empirical understanding of how EU-level defence industrial cooperation functions in practice. Using the Liberal Intergovernmental theoretical model, the book argues that while national economic preferences are an essential factor of government interests they only explain part of the dynamic that leads to the development of defence industrial policy at EU level. Moving beyond a simple adumbration of economic preferences, it shows how the EU’s institutional framework and corpus of law are used by governments to re-affirm their position as the ultimate arbiter and promoter of national economic preferences in the defence industrial sector. To this end, the work asks why and how EU member state governments, European defence firms, and EU institutions developed EU-level defence industrial policy between 2003 and 2009. The book also analyses significant policy developments, including the establishment of a European defence agency and two EU directives on equipment transfers and defence procurement.

DEMOCRACY
Title: Democracies and Authoritarian Regimes
Author: Kendall-Taylor, Andrea
Additional Author: Lindstaedt, Natasha
Additional Author: Frantz, Erica
Published: Oxford, UK : Oxford University Press, 2019
Physical Description: xvi, 356 pages ; 25 cm.
Notes: This book addresses the political dynamics that are shaping the competition between democracy and authoritarianism. The book covers trends across the full spectrum of political systems, from democracy to dictatorship and the growing number of systems that fall between. It distils cutting-edge scholarship to explain how authoritarian regimes maintain power and how they use it, how autocrats' tactics are evolving, and the key factors that will shape democracies' ability to surmount contemporary challenges. The book offers a diverse range of case studies and deep-dives into key concepts that make the material relevant to current events and policy debates.

LEADERSHIP
Title: Thinking the Unthinkable: A New Imperative for Leadership in a Disruptive Age
Author: Gowing, Nik
Additional Author: Langdon, Chris
Published: Melton, UK: John Catt Educational Ltd, 2018
Physical Description: 360 pages; 21 cm.
Notes: Includes index.
Notes: Trump, Brexit, Putin, Populism, Migration. #MeToo. Why is the gulf in trust widening between leaders in business or government and you - the voters, consumers and citizens? This book reveals the private fears of top leaders during candid one-to-one conversations. Many are 'scared' and 'overwhelmed' by the new disruptions. Thriving in a time of change requires a new mindset, culture and behavior. Leaders reveal why a revolution is needed with a new courage, humility, purpose and values. The next generation must have a vital role. Our aim is a new community and process to engage leaders, future leaders and everyone worried about leadership. Join us to think the unthinkable - and find solutions.

Collection Type: General Collection
In July 1958, U.S. Marines stormed the beach in Beirut, Lebanon, ready for combat. They were greeted by vendors and sunbathers. Fortunately, the rest of their mission - helping to end Lebanon’s first civil war - went nearly as smoothly and successfully, thanks in large part to the skillful work of American diplomats who helped arrange a compromise solution. Future American interventions in the region would not work out quite as well. The author tells here the now-forgotten story (forgotten, that is, in the United States) of the first U.S. combat operation in the Middle East. President Eisenhower sent the Marines in the wake of a bloody coup in Iraq, a seismic event that altered politics not only of that country but eventually of the entire region. Eisenhower feared that the coup, along with other conspiracies and events that seemed mysterious back in Washington, threatened American interests in the Middle East. His action, and those of others, were driven in large part by a cast of fascinating characters whose espionage and covert actions could be grist for a movie. Although Eisenhower’s intervention in Lebanon was unique, certainly in its relatively benign outcome, it does hold important lessons for today’s policymakers as they seek to deal with the always unexpected challenges in the Middle East. The author describes the scene as it emerged six decades ago, and he suggests that some of the lessons learned then are still valid today. A key lesson ? Not to rush to judgment when surprised by the unexpected. And don't assume the worst.
Concerns about CBRN (chemical, biological, radioactive and nuclear) weapons have featured prominently in both political debates and media reporting about the ongoing threat from al Qaeda since 9/11. This book provides a chronological account of al Qaeda’s efforts to acquire a CBRN weapon capability, and the evolution of the al Qaeda leadership’s approach to actually using CBRN weapons, set against the context of the politicisation of the threat of CBRN terrorism in US security debates. The author explores how the inherently political nature of terrorist CBRN threats has helped to shape al Qaeda’s approach to CBRN weapons, and shows how the heightened political sensitivities surrounding the threat have enabled some governments to manipulate it in order to generate domestic and international support for controversial policies, particularly the 2003 invasion of Iraq. He assesses the relative success of the al Qaeda leadership’s political approach to CBRN weapons, together with the relative success of efforts by the US, UK and Russian governments to exploit the al Qaeda CBRN threat for their wider political purposes.

Focusing on the rising support for the populist right in Eastern Europe, this book examines how anger and resentment towards minorities is being utilized in politics. The author details the process by which the acquisition of political power and demand for rights by ascendant minority groups precipitates a backlash of mobilization from the radical right. However, this book also argues that prejudice against minorities is not a sentiment exclusive to right-wing voters and is not the root cause of increasing support for the radical right. Rather, this study reveals variation in how minorities are accommodated by the government and explains the electoral successes and failures of radical right parties. By examining their capitalization on these feelings of discontent towards politically assertive minorities and with the governmental policies that yield to their demands, the author exposes volatile, Zeitgeist-dependent conditions under which once fringe right-wing parties have risen to prominent but precarious positions of power.

RUSSIA (FEDERATION)--FOREIGN RELATIONS--EUROPE

Title: Russia, the Former Soviet Republics, and Europe since 1989: Transformation and Tragedy
Author: Graney, Katherine E., 1970-
Published: Oxford, UK: Oxford University Press, 2019
Physical Description: xxviii, 439 pages : illustrations ; 25 cm.
Notes: Bibliography: p. 393-417. Includes index.
Notes: Nearly three decades after the fall of the Berlin Wall, early hopes for the integration of the post-Soviet states into a 'Europe whole and free' seem to have been decisively dashed. Europe itself is in the midst of a multifaceted crisis that threatens the considerable gains of the post-war liberal European experiment. The author provides here a panoramic and historically-rooted overview of the process of 'Europeanization' in Russia and all fourteen of the former Soviet republics since 1989. She argues that deeply rooted ideas about Europe's cultural-civilizational primacy and concerns about both ideological and institutional alignment with Europe continue to influence both internal politics in contemporary Europe and the processes of Europeanization in the post-Soviet world. By comparing the effect of the phenomenon across Russia and the ex-republics, the author provides a theoretically grounded and empirically rich window into how we should study politics in the former USSR.

SECURITY, INTERNATIONAL--RELIGIOUS ASPECTS

Title: Religion and International Security
Author: Marsden, Lee
Published: Cambridge, UK: Polity Press, 2019
Physical Description: x, 270 pages : illustrations ; 22 cm.
Notes: Religious violence is on the rise globally. Barely a day passes without news of a vicious attack carried out in the name of religion. Religion can, of course, bring security to many but its perversion leads to insecurity for all. Why is this? How and why do so many claim to act on God's behalf to inflict deliberate human suffering? The author explores here the return of religion as a major cause of insecurity in the contemporary world. He guides readers through the different theoretical perspectives surrounding the study of religion and security, arguing that the secular bias which marginalised the role played by religion in recent times must change to reflect the realities of the emerging post-secular international order. Packed with examples from around the world, the book offers a thoughtful and nuanced exploration of religion and security through key themes such as religiously motivated and inspired terrorism and warfare, the human security of women and gay people in religiously dominated communities, and the capacity for religious communities and leaders to heal conflict through peacebuilding. For those who would rather deny a role for religion when considering security the genie is truly out of the bottle. This book seeks to understand this phenomenon and how to come to terms with it.

SPECIAL FORCES (MILITARY SCIENCE)--USA
Title: United States Special Operations Forces
Author: Tucker, David, 1951-
Additional Author: Lamb, Christopher J., 1958-
Published: New York : Columbia University Press, 2020
Edition: Second Edition
Notes: Bibliography: p. 357-362. Includes index.
Notes: The authors put here the exploits of America's special operations forces in historical and strategic context. They offer an incisive overview of America's turbulent experience with special operations. Using in-depth interviews with special operators at the forefront of the current war on terrorism and providing a detailed account of how they are selected and trained, the authors illustrate the diversity of modern special operations forces and the strategic value of their unique attributes.

STRATEGY
Title: Strategic Survey : 2019 : The Annual Assessment of Geopolitics
Institution: International Institute for Strategic Studies (GB)
Published: Abingdon, UK : Routledge, 2019
Physical Description: 420 pages : illustrations ; 24 cm.
Notes: This book analyses the events of the year that shaped relations between major powers, region by region. It also features essays on 5G mobile-network technology and geopolitics; China’s view of world order; the fate of the New START agreement; the climatic effects of a limited nuclear war; and the UN’s faltering efforts to end the post-2011 conflicts in the Middle East.

TERRORISM--USA--PREVENTION
Title: Pacifying the Homeland : Intelligence Fusion and Mass Supervision
Author: MacQuade, Brendan
Published: Oakland, CA : University of California Press, 2019
Physical Description: x, 294 pages : illustrations ; 24 cm.
Notes: Bibliography: p. 241-278. Includes index.
Notes: In the last decade, the United States has poured over a billion dollars into a network of interagency intelligence centers called 'fusion centers'. Fusion centers were ostensibly set up to prevent terrorism, but politicians, the press, and policy advocates have repeatedly criticized these centers for failures. Why have these security systems persisted ? This book travels inside the world of intelligence fusion and sees past the apparent failure of fusion centers, to reveal a broader shift away from mass incarceration and toward a more surveillance- and police-intensive system of social regulation.

Notes: War is timeless. Some things change - weapons, tactics, technology, leadership, objectives - but our desire to go into battle does not. We are living in the age of 'durable disorder' - a period of unrest created by numerous factors: China's rise, Russia's resurgence, America's retreat, global terrorism, international criminal empires, climate change, dwindling natural resources, and bloody civil wars. This devastating turmoil has given rise to difficult questions. What is the future of war? How can we survive? If Americans are drawn into major armed conflict, can we win? The author calls upon the legends of military study - Carl von Clausewitz, Sun Tzu, and others, as well as his own experience - and carefully constructs the new rules for the future of military engagement, the ways we can fight and win in an age of entropy: one where corporations, mercenaries, and rogue states have more power and nation-states have less. With examples from the Roman conquest, World War II, Vietnam, Afghanistan and others, he tackles the differences between conventional and future war, the danger in believing that technology will save us, the genuine leverage of psychological and 'shadow' warfare, and much more. The author's new rules distill the essence of war today, describing what it is in the real world, not what we believe or wish it to be. Some of these principles are ancient, others are new, but all will permanently shape war now and in the future. By following them, he argues, we can prevail. But if we do not, terrorists, rogue states, and others who do not fight conventionally will succeed - and rule the world.

Notes: How do we frame decisions to use - or not use - military force? Who should do the killing? Do we need new paradigms to guide the use of force? And what does 'victory' mean in contemporary conflict? In many ways, these are timeless questions. But they should be asked again in light of changing circumstances in the twenty-first century. The post-Cold War, post-9/11 world is one of contested and fragmented sovereignty. Contested because the norm of territorial integrity has shed some of its absolute nature. Fragmented because some states do not control all of their territory and cannot defeat violent groups operating within their borders. Humanitarian intervention, preventive war, and just war are all framing mechanisms aimed at convincing domestic and international audiences to go to war (or not), as well as to decide who is justified in legally and ethically killing. The international group of scholars assembled for this book critically examine these frameworks to ask if they are flawed, and if so, how they can be improved. Finally, the volume contemplates what all the killing and dying is for if victory may prove, ultimately, to be elusive.
WORLD POLITICS
Title: A Political History of the World : Three Thousand Years of War and Peace
Author: Holslag, Jonathan
Published: [s.l.] : Pelican, 2018
Physical Description: 639 pages : illustrations ; 23 cm.
Notes: In three thousand years of history, China has spent at least eleven centuries at war. The Roman Empire was in conflict during at least 50 per cent of its lifetime. Since 1776, the United States has spent over one hundred years at war. The dream of peace has been universal in the history of humanity. So why have we so rarely been able to achieve it? The author has produced here a sweeping history of the world, from the Iron Age to the present, that investigates the causes of conflict between empires, nations and peoples and the attempts at diplomacy and cosmopolitanism. A birds-eye view of three thousand years of history, the book illuminates the forces shaping world politics from Ancient Egypt to the Han Dynasty, the Pax Romana to the rise of Islam, the Peace of Westphalia to the creation of the United Nations. This truly global approach enables the author to search for patterns across different eras and regions, and explore larger questions about war, diplomacy, and power. Has trade fostered peace? What are the limits of diplomacy? How does environmental change affect stability? Is war a universal sin of power?

XI, JINPING
Title: The Third Revolution : Xi Jinping and the New Chinese State
Author: Economy, Elizabeth, 1962-
Institution: Council on Foreign Relations (US)
Published: Oxford, UK : Oxford University Press, 2018
Physical Description: xiv, 347 pages : illustrations ; 24 cm.
Notes: Includes index.
Notes: The author provides here an incisive look at the world’s most populous country. Inheriting a China burdened with slowing economic growth, rampant corruption, choking pollution, and a failing social welfare system, President Xi has reversed course, rejecting the liberalizing reforms of his predecessors. At home, the Chinese leadership has reasserted the role of the state into society and enhanced Party and state control. Beyond its borders, Beijing has recast itself as a great power and has maneuvered itself to be an arbiter - not just a player - on the world stage. Through an exploration of Xi Jinping’s efforts to address top policy priorities - fighting corruption, controlling the internet, reforming state-owned enterprises, improving the country’s innovation capacity, reducing the country’s air pollution, and elevating its presence on the global stage - the author identifies the tensions, shortcomings, and successes of Xi’s first five years in office. Xi’s ambition, she argues, provides new opportunities for the United States and the rest of the world to encourage greater Chinese contribution to global public goods but also necessitates a more proactive and coordinated effort to counter the rapidly expanding influence of an illiberal power within a liberal world order.

ARTIFICIAL INTELLIGENCE--MILITARY APPLICATIONS
Title: Artificial Intelligence & Future Warfare: Implications for International Security
Author: Johnson, James
Published: 2019
Notes: Recent developments in artificial intelligence (AI) suggest that this emerging technology will have a deterministic and potentially transformative influence on military power, strategic competition, and world politics more broadly. After the initial surge of broad speculation in the literature related to AI this article provides some much needed specificity to the debate. It argues that left unchecked the uncertainties and vulnerabilities created by the rapid proliferation and diffusion of AI could become a major potential source of instability and great power strategic rivalry. The article identifies several AI-related innovations and technological developments that will likely have genuine consequences for military applications from a tactical battlefield perspective to the strategic level.

CHINA--FOREIGN RELATIONS
Title: China in a World of Orders: Rethinking Compliance and Challenge in Beijing's International Relations
Author: Johnston, Alastair Iain
Published: 2019
Notes: Many scholars and policymakers in the United States accept the narrative that China is a revisionist state challenging the U.S.-dominated international liberal order. The narrative assumes that there is a singular liberal order and that it is obvious what constitutes a challenge to it. The concepts of order and challenge are, however, poorly operationalized. There are at least four plausible operationalizations of order, three of which are explicitly or implicitly embodied in the dominant narrative. These tend to assume, ahistorically, that U.S. interests and the content of the liberal order are almost identical. The fourth operationalization views order as an emergent property of the interaction of multiple state, substate, nonstate, and international actors. As a result, there are at least eight 'issue-specific orders' (e.g., military, trade, information, and political development). Some of these China accepts; some it rejects; and some it is willing to live with. Given these multiple orders and varying levels of challenge, the narrative of a U.S.-dominated liberal international order being challenged by a revisionist China makes little conceptual or empirical sense. The findings point to the need to develop more generalizable ways of observing orders and compliance.

CRISIS MANAGEMENT
Title: Crisis Responders: Comparing Policy Approaches of the EU, the UN, NATO and OSCE with Experiences in the Field.
Author: Debuyser, Loes
Additional Author: Blockmans, Steven
Published: 2019
Notes: The EU aims at being a prominent global crisis responder but its member states act also through the UN, NATO, Organization for Security and Co-Operation in Europe (OSCE) to achieve both short-term stabilization by military and/or civilian means, as well as longer term conflict prevention and transformation. By comparing the policy approaches of these four multilateral organizations to conflicts and crises, this article shows how the broad principle of comprehensiveness has been developed to fit different institutional logics, this leading to divergences in approach. Distilling findings from empirical research conducted in Afghanistan, Iraq, Kosovo, Libya, Mali and Ukraine, this article synthesizes lessons about varying levels of the EU’s and the other organizations’ conflict sensitivity, effective multilateralism, value-based approach and application of the principle of local ownership in theatre.

EU--MILITARY POLICY--PUBLIC OPINION
Title: A More Martial Europe? Public Opinion, Permissive Consensus, and EU Defence Policy
Author: Schilde, Kaija E.
Additional Author: Anderson, Stephanie B.
Additional Author: Garner, Andrew D.
Published: 2019
Notes: EU defence policy has been extremely popular over the past three decades, averaging around 75% public support. In fact, no other policy domain is as popular and robust as the idea of pooling national sovereignty over defence. However, public support for EU defence has been dismissed as mere 'permissive consensus', rather than genuine support. Scholars have often assumed that public opinion towards European integration is passive and shallow, especially over foreign policy issues, where the public has limited understanding of the complexity of issues. Consistent with contemporary findings about the complexity of comparative foreign policy attitudes, the authors contest the permissive consensus logic and demonstrate that European publics have held coherent preferences over the use of force at the European level. The authors conclude that the slow progress of integration in this area is due to the reluctance of elites rather than to the reticence of Europe’s citizens.

**EUROPE, EASTERN--OPERATIONAL READINESS**

**Title:** What Are Governments in Central and Eastern Europe Not Buying with Their Defence Budgets ? The Readiness Clue

**Author:** Young, Thomas-Durell

**Published:** 2019

**In:** RUSI JOURNAL, vol. vol. 164, no. 2, March 2019, p. 36-55.

**Notes:** This article examines why readiness has not been accepted as a critical element of defence governance by defence institutions in Central and Eastern Europe. The author presents a survey of known instances of readiness under-performance, based on an analysis of publicly available information, to create a macro view of the problem, grouped by services across the region to facilitate comparability. He highlights cases of success and identifies the factors which contributed to such outcomes to learn lessons which can be replicated elsewhere. Finally, in order to provide a degree of continuity and context, the Slovenian armed forces are examined in each category.

**MEDIATION, INTERNATIONAL**

**Title:** The Motivation of European Union Mediation in Civil Conflicts

**Author:** Scaller, Jamie E.

**Additional Author:** Wiegand, Krista E.

**Published:** 2018

**In:** EUROPEAN SECURITY, vol. 27, no. 4, December 2018, p. 434-452.

**Notes:** Since the EU has expanded its common security focus in the 1990s, this important regional organisation has become the most frequent mediator in low-level civil conflicts worldwide. Under what conditions is the European Union (EU) likely to become involved in mediation in civil conflicts? Is the participation in mediation only explained by the EU's bias toward its near abroad, or is the EU more strategic? Some scholars have suggested that the EU's regional bias for its near abroad is the key explanation for the onset of EU mediation, but the authors propose that the reality of EU mediation presents a more nuanced story. They posit three explanations based on mediator bias: regional bias, economic bias, and normative bias. Overall, they argue that the EU will mediate in civil conflicts that are in its near abroad, but also where the EU has economic bias and where the EU can exercise its normative power in highly intractable conflicts. The authors test their hypotheses using statistical analysis of the UCDP low-level civil conflicts data from 1993 to 2004 and Civil War Mediation data from 1974 to 2005. They find strong support for their hypotheses, determining key factors that reveal the EU's strategic onset of mediation.

Title: Transatlantic Burden Sharing: Suggesting a New Research Agenda
Author: Zyla, Benjamin
Published: 2018
Notes: Current studies on NATO burden sharing are only able to show some weak statistical trends between selective variables; they are unable to explain and show why this trend exists and why it occurred at particular times (or not). This is due to the dominant deductive and hypothesis testing research designs that prevent researchers to produce richer causal explanations or intersubjective understandings of how states, for example, construct and assign meaning to burdens or what forms of social representation, values, norms and ideals influence the making of (national) burden sharing decisions. Thus, we charge, the literature needs to adopt an eclecticist approach to studying NATO burden sharing – that is to combine rationalist with sociological approaches and methodologies highlighting the importance of intersubjective meanings and the role of social forces, norms, beliefs, and values. The article lays out what such a research programme might look like and how one could operationalise it.

NUCLEAR WEAPONS--GOVERNMENT POLICY--CHINA
Title: Dangerous Confidence ? Chinese Views on Nuclear Escalation
Author: Cunningham, Fiona S.
Additional Author: Fravel, M. Taylor
Published: 2019
Notes: Chinese views of nuclear escalation are key to assessing the potential for nuclear escalation in a crisis or armed conflict between the United States and China, but they have not been examined systematically. A review of original Chinese-language sources and interviews with members of China's strategic community suggest that China is skeptical that nuclear escalation could be controlled once nuclear weapons are used and, thus, leaders would be restrained from pursuing even limited use. These views are reflected in China's nuclear operational doctrine (which outlines plans for retaliatory strikes only and lacks any clear plans for limited nuclear use) and its force structure (which lacks tactical nuclear weapons). The long-standing decoupling of Chinese nuclear and conventional strategy, organizational biases within China's strategic community, and the availability of space, cyber, and conventional missile weapons as alternative sources of strategic leverage best explain Chinese views toward nuclear escalation. China's confidence that a U.S.-China conflict would not escalate to the use of nuclear weapons may hamper its ability to identify nuclear escalation risks in such a scenario. Meanwhile, U.S. scholars and policymakers emphasize the risk of inadvertent escalation in a conflict with China, but they are more confident than their Chinese counterparts that the use of nuclear weapons could remain limited. When combined, these contrasting views could create pressure for a U.S.-China conflict to escalate rapidly into an unlimited nuclear war.

POPULISM--USA
Title: A Populist Grand Strategy? Trump and the Framing of American Decline
Author: Biegon, Rubrick
Published: 2019
Notes: What is the role of 'populism' in Donald Trump's foreign policy? Defining populism as a framing style that constructs antagonisms around 'the people' and their adversaries, this article explores Trump's rhetoric in relation to his efforts to shift US grand strategy away from its traditional investment in the liberal international order. Based on an approach grounded in the ontological commitments of critical discourse analysis, it examines three interlocking frames: (1) the 'corrupt' elites of the establishment 'swamp'; (2) the anti-globalist, 'America first' agenda; and (3) poor deal-making responsible for the United States 'losing' in international affairs. In responding to declinist themes and anxieties, Trump's populist rhetoric frames a Jacksonian ideological approach based on nationalism, mercantilism and a reliance on coercive power.

RESPONSIBILITY TO PROTECT (INTERNATIONAL LAW)
Title: The European Union and the Responsibility to Protect
Author: Schmidt, Julia
Published: 2019
Notes: The European Union has committed itself to the promotion and the implementation of the Responsibility to Protect (R2P) in political statements, most recently in the EU Global Strategy. When taking a closer look at the activities of the EU in the context of humanitarian crises that can be brought within the R2P framework, the strength and effectiveness of the EU's support might be questioned. This article examines the EU's interest in the R2P by addressing the factors that inspired the EU's openness towards the concept and by examining whether the EU's commitment to the R2P falls within its general ambitions to contribute to international security or whether the EU is placing human suffering at the core of its considerations. In addition, this article questions to what extent the EU is capable of pursuing its own interest in the R2P and to what extent the EU is held back in implementing its commitment to the R2P by differing EU Member State approaches. It is shown that the EU is strongly committed to fulfilling its collective responsibilities in partnership with the United Nations and that the focus of the EU's activities has been put on atrocity prevention.

SECURITY SECTOR REFORM–UKRAINE
Title: From Revolution to Reform and Back: EU-Security Sector Reform in Ukraine
Author: Jayasundara-Smits, Shyamika
Published: 2018
Notes: Security Sector Reform (SSR) is an important element of the EU’s external intervention toolkit. In an increasingly uncertain global security environment, the EU has currently stepped up its SSR endeavours. However, success of these efforts largely depends on the EU’s capabilities in navigating complex context-specific challenges. In particular the EU needs to be able to simultaneously address the functional and normative-societal imperatives that underpin SSR. This article considers the case of the EU’s ongoing SSR mission to Ukraine — the European Union Advisory Mission (EUAM). It asks, what are the unique context-specific challenges faced by EUAM in Ukraine? How do these challenges influence the EU’s ability to satisfy both the normative-societal imperative of SSR through the EUAM? This article mainly relies on secondary data, and applies a ‘Whole of Society’ approach to conflict prevention and peacebuilding (WOS). Amidst a situation of ongoing multiple armed conflicts and EU-Russian relations of mutual dependence, a key finding is that the mandate of the mission has become more narrow and exclusive by sacrificing vertical coherence and the normative-societal imperative. The author recommends EUAM adopt a more ‘revolutionary’ approach to SSR, by adhering to key SSR normative principles so that the mission can overcome the challenges of the unique reform environment of Ukraine. This will also make it able to contribute more meaningfully to the wider reform process in an effective and sustainable manner.

L'eurasisme et le rapprochement entre la Turquie et la Russie

**Author:**
Balci, Bayram

**Published:**
2019

**In:**

**Notes:**
De nombreuses analyses expliquent le rapprochement entre la Turquie et la Russie par la bonne entente personnelle entre Vladimir Poutine et Recep Tayyip Erdogan, qui seraient tous deux de meme temperament et style politique. Toutefois, ce rapprochement turco-russe n'est pas sans fondements ideologiques anciens, datant des premières années de l'Union sovietique et de la République kimaliste, durant lesquelles les deux jeunes Etats entretendaient des relations difficiles avec l'Occident. Aussi, la recente reactivation de leur bonne entente doit être replacée dans un contexte nouveau, dans lequel les deux anciennes nations imperiales se sentent à nouveau rejettees par un Occident lui-meme en manque d'imagination pour gerer ses relations avec ses deux voisins orientaux. Cette entente est cependant fragile et son avenir depend de l'évolution de la crise syrienne, qui a également joue un role crucial dans ce rapprochement entre Ankara et Moscou.

Title: The Changing Fundamentals of US-China Relations  
Author: Medeiros, Evan S.  
Published: 2019  
Notes: Longer-term structural and short-term cyclical drivers are both pushing US-China relations in a more competitive direction, while classic buffers and stabilizers are arguably inoperative. US-China competition is, thus, more of a condition than a strategy, leading the former NSC senior director for Asia to argue that calling for competition with China is not enough; the key debates are how the United States competes - with what tools, on what issues, and at what costs.

Title: L'etat des relations transatlantiques : quelles reponses europeennes ?  
Author: Conway-Mouret, Helene  
Published: 2019  
Notes: Les relations transatlantiques traversent une crise sans precedent depuis 1945. Deja serieusement alteres par le 'pivot' etats-unien vers l'Asie ainsi que par la frustration de Washington devant les depenses militaires jugees insuffisantes des European, elles se sont encore degradees apres l'élection de Donald Trump a la présidence des Etats-Unis. Dans ce contexte, l'Europe se doit de reagir afin d'organiser sa propre securite et de devenir une grande puissance. Il s'agirait, pour atteindre cet objectif ambitieux, d'orienter les efforts europeens selon trois axes : s'interroger de maniere collective sur les depenses europeennes en materie de defense et les enjeux strategiques qui en decoulent, redefinir les relations institutionnelles avec l'OTAN et miser sur l'autonomie strategique de l'Union europeenne dans le cadre d'une relation renouvelee avec les Etats-Unis.

At first glance, the Middle East and North Africa (MENA) region appears particularly unsuited to conducting foresight exercises due to its many disruptive and surprising developments. But beyond their actual predictability, it is precisely because the region features so many sudden events that foresight here is crucial. While the region appears to have recovered from some of the shocks of 2011 and its aftermath, the next decade will bring new and more substantial challenges: climate change is beginning to become a dark reality in the region, urbanization and conflict could become a toxic mix, a new, digital generation is reaching political maturity and global energy shifts are beginning to be felt. The geostrategic landscape of the region is shifting, too, with new actors emerging and old ones retreating.

This paper - which uses space exploration as a metaphor to demystify some of the concepts and challenges linked to cyber-related policymaking - focuses on the EU’s cyber sanctions regime. The newly-established regime represents a significant achievement in the EU’s ambition to defend the rules-based international order, and ensure broader global adherence to agreed norms of responsible behavior in cyberspace. However, this growing complexity of cyber threats and the proliferation of malicious actors in the cyber domain indicate that the scale of the challenges ahead should not be underestimated. The EU’s autonomous cyber sanctions regime constitutes a unique solution to the challenge of compliance with international law and norms of state behavior. Taking account of the lessons derived from other sanctions regimes adopted by the EU in the past, the volume addresses a number of key issues relevant for ensuring the maximum effectiveness of the new regime. These include the problematic nature of attribution, state responsibility in cyberspace, listing and de-listing criteria, the principle of due diligence or the potential impact of cyber sanctions on the physical world.

In this book, the author examines the common assumption that states usually respond to crises individually, rather than together. He develops an innovative approach to analyse how crisis co-management comes to succeed or fail. He argues that actors draw from repertoires of taken-for-granted ideas, forming a set of pre-judgments. These are then revisited in justificatory encounters, making various degrees of co-management possible or impossible. This judging and justifying in turn leaves an impression on repertoires put to use for co-managing the next crisis. The author uses this model to analyse the attempts by France, Germany and the United Kingdom to co-manage the crises in Bosnia, Kosovo, Afghanistan and Iraq. He links individual reasoning and communication, paving the way for further research into crisis co-management, and providing novel insights into European attempts to act in international affairs.

Notes: Bibliography. Includes index.
In 2014, NATO began a transformation from out-of-area crisis management operations to deterrence and defence at home. NATO’s current force posture of a limited forward presence on the eastern flank puts a premium on the capability for rapid reinforcement if credible deterrence is to be achieved. However, the practical, legal-bureaucratic and infrastructural obstacles to rapid reinforcements are many. Within NATO, the many initiatives launched to facilitate reinforcements have created ambiguities and overlapping mandates in the command and force structure. While capabilities have improved, greater access to national forces available at high readiness, early decision-making, enhanced mandates for NATO’s commanders, and large-scale deployment exercises seem important to strengthen NATO’s evolving defence strategy. At the national level, regular rotations of US forces to the eastern flank have enhanced the US logistic support machinery. European NATO members could invest more in infrastructure and logistical support capabilities. Fundamentally, NATO’s posture and defence strategy are products of its member states’ diverse threat perceptions and priorities. Thus, compromises and work-around solutions to maintain Alliance cohesion have created a mix of symbolism and real capabilities. The heart of the issue is whether NATO should aim for deterrence or also prepare for defence, which is more costly.
Recent events in Crimea and the Donbass in eastern Ukraine have upended relations between Russia and the West, specifically the North Atlantic Treaty Organization (NATO) and the European Union (EU). Although Russia's actions in Ukraine were, for the most part, acts of outright aggression, Russia has been aiming to destabilize both its 'near abroad' — the former Soviet states except for the Baltics - and wider Europe through the use of ambiguous 'gray zone' tactics. These tactics include everything from propaganda and disinformation to election interference and the incitement of violence. To better understand where there are vulnerabilities to Russian gray zone tactics in Europe and how to effectively counter them, the RAND Corporation ran a series of war games. These games comprised a Russian (Red) team, which was tasked with expanding its influence and undermining NATO unity, competing against a European (Green) team and a U.S. (Blue) team, which were aiming to defend their allies from Red's gray zone activities without provoking an outright war. In these games, the authors of this report observed patterns of behavior from the three teams that are broadly consistent with what has been observed in the real world. This report presents key insights from these games and from the research effort that informed them.
LANGUAGE AND LANGUAGES--POLITICAL ASPECTS
Title: Communication, Interpreting and Language in Wartime : Historical and Contemporary Perspectives [electronic resource]
Author: Laugesen, Amanda
Additional Author: Gehrmann, Richard
Published: Cham, Switzerland : Palgrave MacMillan, 2020
Physical Description: 1 online resource (274 pages)
Series: Palgrave Studies in Languages at War
Notes: This book provides a multi-disciplinary approach to the topics of translation and cross-cultural communication in times of war and conflict. It examines the historical and contemporary experiences of interpreters in war and in war crimes trials, as well as considering policy issues in communication difficulties in war-related contexts.

LOW-INTENSITY CONFLICTS (MILITARY SCIENCE)--RUSSIA (FEDERATION)
Title: Russia's Hostile Measures : Combating Russian Gray Zone Aggression Against NATO in the Contact, Blunt, and Surge Layers of Competition [electronic resource]
Institution: Rand Corporation (US)
Published: Santa Monica, CA : Rand Corporation, 2020
Physical Description: 1 online resource (116 pages)
Series: Research Reports ; RR-2539-A
Notes: Russia's conventional capabilities pose a serious threat to NATO that remains mostly untested. Where it has historically succeeded is in using various types of hostile measures to sow disorder, weaken democratic institutions, and undermine NATO cohesion and what Russia perceives as the eastward expansion of Western institutions. However, Russia also has a long track record of strategic shortfalls, and even some ineptitude. Formulating strategies for addressing these actions demands a clear understanding of how and why Russian leaders employ hostile measures - for example, economic embargoes, limited military incursions, cyberattacks, and information campaigns. A historical review of Soviet-era power dynamics and detailed case studies of Russian hostile measures in the post-Soviet era help clarify the conditions under which Russia employs hostile measures and vulnerabilities it exploits in the countries it targets - as well as the message theses measures send to other key audiences, such as Russia's domestic public, the Russian diaspora, and Western powers that Russia perceives as encroaching on its sphere of influence. NATO and other Western powers will benefit from exploring opportunities to deter, prevent, and counter Russian hostile behavior in the so-called gray zone short of war, where daily adversarial competition occurs. Many of the behaviors that Russia exhibits in the gray zone will no doubt extend to conventional war.

Title: A Long-Term Perspective on NATO and the Multinational Order [electronic resource]
Author: Ulgen, Sinan
Institution: Istituto Affari Internazionali (IT)
Published: Roma : Istituto Affari Internazionali, 2019
Physical Description: 1 online resource (16 pages)
Series: IAI Papers ; 19/24
Notes: The evolving external threat environment is impacting the internal political dynamics of NATO nations and is accentuating a series of already existing trends - differences in threat perceptions, burden-sharing difficulties, challenges to respond to sub-threshold threats and the rise of populism – which altogether affect the cohesiveness and potentially the effectiveness of NATO as a political and military alliance. NATO’s operational future over the next decades will be shaped by the ingenuity of the transatlantic leadership in developing new arrangements of institutional cooperation between the Alliance and the burgeoning forms of the ‘coalition of the willing’. The Alliance should nonetheless remain the main transatlantic political forum, given Brexit as well as the rising need for a common political response to the many challenges ranging from migration to failed states. NATO has been relatively successful in adapting to the changing security environment. Its military capabilities remain unparalleled and unrivalled. The more interesting question is however the political one. Namely how the politics of sustaining this Alliance are being shaped by the underlying dynamics that are transforming the global political, economic and military context.

Title: Now and Then : Navigating the Security Agenda between Russia and NATO [electronic resource]
Author: Wood, Andrew
Published: London : European Leadership Network, 2019
Physical Description: 1 online resource (9 pages)
Series: Euro-Atlantic Security Policy Brief
Notes: The evolution of a wide-ranging system of agreements and understandings moderating security risks during the Cold War period was built upon an extended, if sometimes difficult, interchange between the United States and its NATO partners on the one hand, and the members of the Soviet-directed Warsaw Pact on the other. Its evolution also required substantive exchanges as to competing aims and interests within the rival blocs. The system that then emerged and retained a degree of practical effect even after the collapse of the USSR has since deteriorated to the point of extinction, even as confrontation between Russia and NATO has been reborn. In this policy brief, the author considers what lessons, if any, are worth drawing for the situation now from the experience of navigating the Soviet-NATO interchange then.

POWER (SOCIAL SCIENCES)--POLITICAL ASPECTS

Title: Power and Its Logic : Politics and How to Master It [electronic resource]
Author: Meier, Dominik
Additional Author: Blum, Christian
Published: Bielefeld : Transcript Verlag, 2019
Physical Description: 1 online resource (308 pages)
Notes: Power is the essence of politics. Whoever seeks to understand and master it must understand its logic. Drawing on two decades of international experience in political consulting, the authors give profound and honest insights into the inner workings of power. Introducing their Power Leadership Approach, they provide a conceptual analysis of power and present the tools to successfully exercise it in the political domain.

RUSSIA (FEDERATION)--FOREIGN RELATIONS--BALKAN PENINSULA

Title: Russia's Strategic Interests and Tools of Influence in the Western Balkans [electronic resource]
Author: Bechev, Dimitar
Institution: NATO Strategic Communications Centre of Excellence (LG)
Published: Riga : NATO Strategic Communications Centre of Excellence, 2019
Physical Description: 1 online resource (36 pages)
Notes: This paper starts with an analysis of the Western Balkans' place in Russia's strategy. The main contention is that Moscow's paramount objective is balancing the power of NATO and the EU rather than establishing regional hegemony. The paper then takes a closer look at Russia's toolbox and the instruments it leverages to assert its interests across former Yugoslavia and Southeast Europe as a whole, and ends with several recommendations on how the West should respond to the Russian challenge.

WAR--CAUSES

Title: Only the Dead : The Persistence of War in the Modern Age [electronic resource]
Author: Braumoeller, Bear F.
Published: Oxford, UK : Oxford University Press, 2019
Physical Description: 1 online resource (xxiii, 314 pages)
Notes: Bibliography: p. 269-294. Includes index.
Notes: The idea that war is going out of style has become the conventional wisdom in recent years. But the author demonstrates here that it shouldn't have. With a rare combination of historical expertise, statistical acumen, and accessible prose, he shows that the evidence simply doesn't support the decline-of-war thesis propounded by scholars like Steven Pinker. He argues that the key to understanding trends in warfare lies, not in the spread of humanitarian values, but rather in the formation of international orders - sets of expectations about behavior that allow countries to work in concert, as they did in the Concert of Europe and have done in the postwar Western liberal order. With a nod toward the American sociologist Charles Tilly, who argued that 'war made the state and the state made war', the author argues that the same is true of international orders: while they reduce conflict within their borders, they can also clash violently with one another, as the Western and communist orders did throughout the Cold War. Both highly readable and rigorous, this book offers a realistic assessment of humanity's quest to abolish warfare. While pessimists have been too quick to discount the successes of our attempts to reduce international conflict, optimists are prone to put too much faith in human nature. Reality lies somewhere in between: While the aspirations of humankind to govern its behavior with reason and justice have had shocking success in moderating the harsh dictates of realpolitik, the institutions that we have created to prevent war are unlikely to achieve anything like total success - as evidenced by the multitude of conflicts in recent decades. As the old adage advises us, only the dead have seen the end of war.

WAR--PUBLIC OPINION--SEX DIFFERENCES
Title: Gender, War, and World Order : A Study of Public Opinion [electronic resource]
Author: Eichenberg, Richard C., 1952-
Published: Ithaca, NY : Cornell University Press, 2019
Physical Description: 1 online resource (xvii, 181 pages)
Series: Cornell Studies in Security Affairs
Notes: Bibliography. Includes index.
Notes: Motivated by the lack of scholarly understanding of the substantial gender difference in attitudes toward the use of military force, the author has mined a massive data set of public opinion surveys to draw new and important conclusions. He poses three questions of the data: are there significant differences in the opinions of men and women on issues of national security? What differences can be discerned across issues, culture, and time? And what are the theoretical and political implications of these attitudinal differences? Within this framework, this book compares gender differences on military power, balance of power, alliances, international institutions, the acceptability of war, defense spending, defense/welfare compromises, and torture. The author concludes that the centrality of military force, violence, and war is the single most important variable affecting gender difference; that the magnitude of gender difference on security issues correlates with the economic development and level of gender equality in a society; and that the country with the most consistent gender polarization across the widest range of issues is the United States.

WOMEN AND PEACE
Title: Gender Roles in Peace and Security : Prevent, Protect, Participate [electronic resource]
Additional Author: Scheuermann, Manuela, 1977-, ed.
Additional Author: Zurn, Anja, ed.
Published: Cham, Switzerland : Springer, 2020
Physical Description: 1 online resource (219 pages)
Notes: This volume examines the specific gender roles in peace and security. The authors analyse the implementation process of United Nations Security Council Resolution 1325 in various countries and discuss systemic challenges concerning the Women, Peace and Security agenda. Through in-depth case studies, the authors shed new light on topics such as the gender-related mechanisms of peace processes, gender training practices for police personnel, and the importance of violence prevention. The volume studies the role of women in peace and security as well as questions of gender mainstreaming by adopting various theoretical concepts, including feminist theories, concepts of masculinity, organizational and security studies. It also highlights regional and transnational approaches for the implementation of the Women, Peace and Security agenda, namely the perspectives of the European Union, NATO, the UN bureaucracy and the civil society. It presents best cases and political advice for tackling the problem of gender inequality in peace and security.

**WOMEN AND WAR**

**Title:** Gender and War : International and Transitional Justice Perspectives [electronic resource]

**Additional Author:** Mouthaan, Solange, ed.

**Additional Author:** Jurasz, Olga, ed.

**Published:** Cambridge, UK : Intersentia, 2019

**Physical Description:** 1 online resource (xx, 360 pages)

**Notes:** This book explores and challenges common assumptions about gender, conflict, and post-conflict situations. It critically examines the gendered aspects of international and transitional justice processes by subverting traditional understandings of how wars are waged, the power dynamics involved, and the experiences of victims. The book also highlights the gendered stereotypes that underpin the (mis)perceptions about gender and war in order to reveal the multi-dimensional nature of modern conflicts and their aftermaths. Featuring contributions from academics in law, criminology, international relations, politics and psychology, as well as legal practitioners in the field, this book offers a unique and multi-disciplinary insight into contemporary understandings of conflict and explores the potential for international and transitional justice processes to evolve in order to better acknowledge diverse and gendered experiences of modern conflicts.

**WOMEN AND WAR--HISTORY**

**Title:** Race and Gender in Modern Western Warfare [electronic resource]

**Author:** Wintermute, Bobby A.

**Additional Author:** Ulbrich, David

**Published:** Berlin : De Gruyter, 2018

**Physical Description:** 1 online resource (442 pages)

**Notes:** Bibliography. Includes index.

**Notes:** This book fills a gap in the historiographical and theoretical fields of race, gender, and war. It offers an introduction into how cultural constructions of identity are transformed by war and how they in turn influence the nature of military institutions and conflicts. Focusing on the modern West, this project begins by introducing the contours of race and gender theories as they have evolved and how they are employed by historians, anthropologists, sociologists, and other scholars. The project then mixes chronological narrative with analysis and historiography as it takes the reader through a series of case studies, ranging from the early nineteenth century to the Global War of Terror. The purpose throughout is not merely to create a list of so-called ‘great moments’ in race and gender, but to create a meta-landscape in which readers can learn to identify for themselves the disjunctures, flaws, and critical synergies in the traditional memory and history of a largely monochrome and male-exclusive military experience. The final chapter considers the current challenges that Western societies, particularly the United States, face in imposing social diversity and tolerance on statist military structures in a climates of sometimes vitriolic public debate. This book represents our effort to blend race, gender, and military war, to problematize these intersections, and then provide some answers to those problems.
